

Courses and Programs of Study

ELEMENTARY SCHOOL
(GRADES PreK to 6)

Fall 2017

PGCPS COURSES AND PROGRAMS OF STUDY ELEMENTARY SCHOOL

Courses listed in this publication make up the instructional program for the school system's elementary schools. Only approved core curricula are available at all sites, and courses may not be offered during this school year if enrollment does not permit. Prerequisites are conditions that must be met in order to enroll in a course. Credits are used for scheduling and grade point average calculations.

Information in this publication may change.

Contact the content area office listed in the Phone Directory for updates.

FINE ARTS

FINE ARTS - INSTRUMENTAL MUSIC

Beginning Instrumental Music

Course Code: 64400

Prerequisites: None

Beginning instruction for band and orchestra instruments. Basic techniques are presented including note/music reading, interpreting of musical symbols, basic music terminology, producing a sound, proper care and assembly of instruments, proper posture, playing, and hand position, embouchure, and breath support. In most cases, an instrument is rented by the parent through a music store. PGCPs has a limited number of instruments that may be loaned to students with a confirmed financial need. Students are expected to practice at home at least four days per week and attend two classes in school each week. Students may be in grades 4, 5, or 6 to enroll in this class.

Textbook(s): Accent on Achievement Book 1, Essential Elements 2000 Book 1, New Directions for Strings Book 1

Intermediate Instrumental Music

Course Code: 64500

Prerequisites: Beginning Instrumental Music

In Intermediate (2nd year) instruction for band and orchestra instruments, intermediate techniques, keys, and musical concepts are presented in addition to more complex rhythms, note reading, musical symbols. In most cases, an instrument is rented by the parent through a music store. PGCPs has a limited number of instruments that may be loaned to students with a confirmed financial need. Students are expected to attend two classes in school and to practice at home at least four days per week. Students may be in grades 4, 5, or 6 to enroll in this class.

Textbook(s): Accent on Achievement Book 1 and 2, Essential Elements 2000 Book 1 and 2, New Directions for Strings Book 1 and 2

Advanced Instrumental Music

Course Code: 64600

Prerequisites: Intermediate Instrumental Music

In advanced (3rd year) instruction for band and orchestra instruments, emphasis is placed on advanced techniques, keys, and musical concepts. In most cases, an instrument is rented by the parent through a music store. PGCPs has a limited number of instruments that may be loaned to students with a confirmed financial need. Students are expected to attend two classes in school and to practice at home at least four days per week. Students may be in grades 5 or 6 to enroll in this class.

Textbook(s): Accent on Achievement Book 2, Essential Elements 2000 Book 2, New Directions for Strings Book 2

FINE ARTS - MEDIA ARTS

Elementary Media Arts

Course Code: 77600

Prerequisites: None

Elementary Media Arts is a repeatable semester-long course that combines knowledge, skills, and techniques involving media arts literacies. Explored topics include digital citizenship, media production, digital storytelling, the design process and making, and basic technology operations and concepts. Learning activities are aligned with the new ISTE Standards for Students, which help to enable students to engage and thrive in a connected, digital world.

Textbook(s): None

FINE ARTS - VOCAL AND GENERAL MUSIC

Beginning Chorus

Course Code: 65400

Prerequisites: None

The teacher through careful selection of repertoire, attention to instructional guidelines and by encouraging expressive singing will assist students in gaining an understanding and appreciation for aesthetic choral singing. Students participating in chorus will learn to sing with a freely produced tone quality that is age appropriate. Students will develop the skills to sing in partsunison and rounds with independence, maintaining their vocal line. Students will sing with controlled breathing, correct diction, in tune and balanced with other voices and instruments. Additionally, students will develop the necessary skills to sight read with accuracy. Finally, students may participate in county Choral Performance Assessments.

Textbook(s): *Spotlight on Music, The Singing Musician Level I; teacher selected choral repertoire*

Intermediate Chorus

Course Code: 65500

Prerequisites: Beginning Chorus

The teacher through careful selection of repertoire, attention to instructional guidelines and by encouraging expressive singing will assist students in gaining an understanding and appreciation for aesthetic choral singing. Students participating in chorus will learn to sing with a freely produced tone quality that is age appropriate. Students will develop the skills to sing in 2 parts with independence, maintaining their vocal line. Students will sing with controlled breathing, correct diction, in tune and balanced with other voices and instruments. Additionally, students will develop the necessary skills to sight read with accuracy. Finally, students may participate in county Choral Performance Assessments.

Textbook(s): *Spotlight on Music, The Singing Musician Level I; teacher selected choral repertoire*

Advanced Chorus

Course Code: 65600

Prerequisites: Intermediate Chorus

The teacher through careful selection of repertoire, attention to instructional guidelines and by encouraging expressive singing will assist students in gaining an understanding and appreciation for aesthetic choral singing. Students participating in chorus will learn to sing with a freely produced

tone quality that is age appropriate. Students will demonstrate the ability to sing in 2 and 3 parts with independence, maintaining their vocal line. Students will sing with controlled breathing, correct diction, in tune and balanced with other voices and instruments. Additionally, students will develop the necessary skills to sight read with a high level of accuracy. Finally, students may participate in county Choral Performance Assessments.

Textbook(s): *Spotlight on Music, The Singing Musician, Level I; teacher selected choral repertoire*

Music Pre-Kindergarten

Course Code: 97100

Prerequisites: None :

The Vocal General Music Program of Instruction provides all students with appropriate resources and experiences to develop positive attitudes and sensitivities toward music. Through the implementation of sequential musical skills and concepts students develop an understanding of the intrinsic value of music and its relationship to diverse cultures, traditions, values and beliefs. The Program is also designed to foster enjoyment and appreciation of music beyond the limits of classroom instruction.

Textbook(s): *Spotlight on Music*

Music Kindergarten

Course Code: 98100

Prerequisites: Music Pre-K

The Vocal General Music Program of Instruction provides all students with appropriate resources and experiences to develop positive attitudes and sensitivities toward music. Through the implementation of sequential musical skills and concepts students develop an understanding of the intrinsic value of music and its relationship to diverse cultures, traditions, values and beliefs. The Program is also designed to foster enjoyment and appreciation of music beyond the limits of classroom instruction.

Textbook(s): *Spotlight on Music*

Music 1

Course Code: 62100

Prerequisites: Music K

The Vocal General Music Program of Instruction provides all students with appropriate resources and experiences to develop positive attitudes and sensitivities toward music. Through the implementation of sequential musical skills and concepts students develop an understanding of the intrinsic value of music and its relationship to diverse cultures, traditions, values and beliefs. The Program is also designed to foster enjoyment and appreciation of music beyond the limits of classroom instruction.

Textbook(s): *Spotlight on Music*

Music 2

Course Code: 62200

Prerequisites: Music 1

The Vocal General Music Program of Instruction provides all students with appropriate resources and experiences to develop positive attitudes and sensitivities toward music. Through the implementation of sequential musical skills and concepts students develop an understanding of the intrinsic value of music and its relationship to diverse cultures, traditions, values and beliefs.

The Program is also designed to foster enjoyment and appreciation of music beyond the limits of classroom instruction.

Textbook(s): *Spotlight on Music*

Music 3

Course Code: 62300

Prerequisites: Music 2

The Vocal General Music Program of Instruction provides all students with appropriate resources and experiences to develop positive attitudes and sensitivities toward music. Through the implementation of sequential musical skills and concepts students develop an understanding of the intrinsic value of music and its relationship to diverse cultures, traditions, values and beliefs. The Program is also designed to foster enjoyment and appreciation of music beyond the limits of classroom instruction.

Textbook(s): *Spotlight on Music, The Singing Musician*

Music 4

Course Code: 62400

Prerequisites: Music 3

The Vocal General Music Program of Instruction provides all students with appropriate resources and experiences to develop positive attitudes and sensitivities toward music. Through the implementation of sequential musical skills and concepts students develop an understanding of the intrinsic value of music and its relationship to diverse cultures, traditions, values and beliefs. The Program is also designed to foster enjoyment and appreciation of music beyond the limits of classroom instruction.

Textbook(s): *Spotlight on Music, The Singing Musician*

Music 5

Course Code: 62500

Prerequisites: Music 4

The Vocal General Music Program of Instruction provides all students with appropriate resources and experiences to develop positive attitudes and sensitivities toward music. Through the implementation of sequential musical skills and concepts students develop an understanding of the intrinsic value of music and its relationship to diverse cultures, traditions, values and beliefs. The Program is also designed to foster enjoyment and appreciation of music beyond the limits of classroom instruction.

Textbook(s): *Spotlight on Music, The Singing Musician*

Music 6

Course Code: 62600

Prerequisites: Music 5

The Vocal General Music Program of Instruction provides all students with appropriate resources and experiences to develop positive attitudes and sensitivities toward music. Through the implementation of sequential musical skills and concepts students develop an understanding of the intrinsic value of music and its relationship to diverse cultures, traditions, values and beliefs. The Program is also designed to foster enjoyment and appreciation of music beyond the limits of classroom instruction.

Textbook(s): *Spotlight on Music, The Singing Musician*

FINE ARTS - VISUAL ARTS

Art Pre-K

Course Code: 97060

Prerequisites: None

The curriculum provides various art experiences that allow students to identify, describe and interpret observed forms. Group activities are a part of this course.

Textbook(s): *Explorations in Art* ebook, Davis Publications

Art K

Course Code: 98060

Prerequisites: None

The curriculum provides various art experiences that allow students to identify, describe and interpret observed forms. Group activities are a part of this course.

Textbook(s): *Explorations in Art* ebook, Davis Publications

Art 1

Course Code: 60100

Prerequisites: None

The curriculum provides various art experiences that allow students to identify, describe and interpret observed forms. Students have opportunities to create images and forms from observation, memory, imagination and feelings. Students also observe and describe artworks using art vocabulary to express personal responses. Group activities are a part of this course.

Textbook(s): *Explorations in Art* ebook, Davis Publications

Art 2

Course Code: 60200

Prerequisites: None

The curriculum provides various art experiences that allow students to identify, describe and interpret observed forms. Students have opportunities to create images and forms from observation, memory, imagination and feelings. Students also observe and describe how artists express ideas using art vocabulary. Group activities are a part of this course.

Textbook(s): *Explorations in Art* ebook, Davis Publications

Art 3

Course Code: 60300

Prerequisites: None

The curriculum provides various art experiences that allow students to identify, describe and interpret observed forms and to describe the similarities. Students have opportunities to create images and forms from observation, memory, imagination and feelings. Students also observe and develop criteria for judging artworks using art vocabulary. Art standards are taught through activities based on the elements of art and principles of design. Students have opportunities to experiment with art media, processes and techniques to generate ideas and express personal meaning.

Textbook(s): *Explorations in Art* ebook, Davis Publications

Art 4

Course Code: 60400

Prerequisites: None

The curriculum provides various art experiences that allow students to identify, describe and interpret observed forms and to analyze ways that art elements are used in artworks. Students have opportunities to express ideas about self, other people, places and events. Students also observe and develop criteria for judging artworks using art vocabulary. Art standards are taught through activities based on the elements of art and principles of design. Students have opportunities to experiment with art media, processes and techniques to generate ideas and express personal meaning. Appropriate use of materials and tools is taught.

Textbook(s): *Explorations in Art* ebook, Davis Publications

Art 5

Course Code: 60500

Prerequisites: None

The curriculum provides various art experiences that allow students to identify, describe and interpret observed forms and to analyze ways that art elements are used in artworks. Students have opportunities to compose and render from observations of subject matter. Students also observe and develop criteria for judging artworks using art vocabulary, as well as differentiate works by others of various cultures and time periods. Art standards are taught through activities based on the elements of art and principles of design. Students have opportunities to experiment with art media, processes and techniques and will use these opportunities to generate and conceptualize ideas to express personal meaning. Appropriate use of materials and tools is taught.

Textbook(s): *Explorations in Art* ebook, Davis Publications

Art 6

Course Code: 60600

Prerequisites: None

The curriculum provides various art experiences that allow students to identify, describe, interpret and produce visual representation of physical qualities of observed forms. Students analyze ways that art elements are used in artworks. Students have opportunities to compose and render from observations of subject matter, memory and imagination. Students also observe and develop criteria for judging artworks using art vocabulary, as well as differentiate works by others of various cultures and time periods. Art standards are taught through activities based on the elements of art and principles of design. Students have opportunities to experiment with art media, processes and techniques and will use these opportunities to generate and conceptualize ideas to express personal meaning. Students learn to classify artworks by selected factors, including subject matter, style and technique. Appropriate use of materials and tools is taught.

Textbook(s): *Explorations in Art* ebook, Davis Publications

HEALTH EDUCATION

Health Education Kindergarten

Course Code: 98110

Prerequisites: None

Health education for young students focuses on what they can do to promote good health and well-being, making clear connections to their immediate environment and health information, concepts, skills, and behaviors.

Textbook(s): Children's Health Market, ISBN 9781606383094

Health Education 1

Course Code: 74100

Prerequisites: None

Health education for young students focuses on what they can do to promote good health and well-being, making clear connections to their immediate environment and health information, concepts, skills, and behaviors. Central themes in first grade Health Education are the acceptance of personal responsibility for lifelong health, respect for and promotion of the health of others, an understanding of the process of growth and development, and informed use of health-related information, products, and services. A continuation of the skills introduced in first grade is promoted.

Textbook(s): Children's Health Market, ISBN 9781606383117

Health Education 2

Course Code: 74200

Prerequisites: None

Health education for young students focuses on what they can do to promote good health and well-being, making clear connections to their immediate environment and health information, concepts, skills, and behaviors. In second grade Health Education, students learn how to care for their bodies, communicate effectively, and positively contribute as members of their classroom and families; identify health resources in the community; practice safe behaviors, prevent common accidents, respond to emergencies; distinguish between helpful and harmful substances; know how to make healthy food choices, participate in active play, and get sufficient sleep; understand the stages of the life cycle; recognize symptoms of common illnesses; and practice good personal hygiene to prevent the spread of disease.

Textbook(s): Children's Health Market, ISBN 9781606383131

Health Education 3

Course Code: 74300

Prerequisites: None

Health Education for intermediate students focuses on how they can assume more responsibility for their health, develop positive health behaviors, and prevent negative, unhealthy behaviors. In grade three Health Education, building upon earlier learning, students learn how to identify health resources in the community; practice safe behaviors, identify hazards and actions to remove those hazards from their surroundings; respond to emergencies and develop conflict resolution skills; learn to make healthy food choices, set personal fitness goals, and meet the sleep needs of a growing body.

Textbook(s): Children's Health Market, ISBN 9781606383155

Health Education 4

Course Code: 74400

Prerequisites: None

Health Education for intermediate students focuses on how they can assume more responsibility for their health, develop positive health behaviors, and prevent negative, unhealthy behaviors. In grade four students learn to practice safe behaviors, identify hazards and actions to remove those hazards from their surroundings, respond to emergencies and develop conflict resolution skills; identify effects of drugs on the body, understand influences that promote drug use, and develop the skills needed to resist those influences.

Textbook(s): Children's Health Market, ISBN 9781606383179

Health Education 5

Course Code: 74500

Prerequisites: None

In grade five Health Education, acceptance of differences in individual growth and development as well as strategies to prevent the use of alcohol, tobacco, and other drugs is woven throughout the curriculum. Students recognize treatments of major communicable and non-communicable diseases and practice good personal hygiene to prevent the spread of disease. The anatomy and physiology of the reproductive system are introduced.

Textbook(s): Children's Health Market, ISBN 9781606383193

Health Education 6

Course Code: 74600

Prerequisites: None

Sixth grade health education is part of a comprehensive, sequential K-12 program that addresses the physical, mental, social, and intellectual dimensions of health. It is designed to assist students to maintain and improve their health, prevent disease, morbidity and mortality, and help them avoid risk-taking behaviors that may be hazardous to their health. Students acquire, develop and refine their health-related knowledge, skills, attitudes, and behaviors.

Textbook(s): Teen Health

MATHEMATICS

Mathematics Thinking - Kindergarten

Course Code: 98030

Prerequisites: None

Instruction will promote mathematical processes/thinking, as detailed in the Standards for Mathematical Practice as well as content standards for Counting and Cardinality, Operations and Algebraic Thinking, Number and Operations in Base Ten, Measurement and Data, and Geometry. Specifications for study within the grade level are detailed in the Maryland College and Career Ready Standards. Skills and concepts will include but are not limited to representing, comparing, and ordering whole numbers and joining and separating sets; describing shapes and space; and ordering objects by measurable attributes.

Textbook(s): *Envision Math 2.0, Vol 1*, ISBN 9780328827343; *Envision Math 2.0, Vol 2*, ISBN 9780328827350

Mathematics 1

Course Code: 30100

Prerequisites: None

Instruction will promote mathematical processes/thinking, as detailed in the Standards for Mathematical Practice as well as content standards for Operations and Algebraic Thinking, Number and Operations in Base Ten, Measurement and Data, and Geometry. Specifications for study within the grade level are detailed in the Maryland College and Career Ready Standards. Skills and concepts will include but are not limited to developing understandings of addition and subtraction and strategies for basic addition facts and related subtraction facts, developing an understanding of whole number relationships and place value, including grouping in tens and ones, developing and understanding linear measurement, and reasoning about attributes of, and composing and decomposing geometric shapes.

Textbook(s): *Envision Math 2.0, Vol 1*, ISBN 9780328827367; *Envision Math 2.0, Vol 2*, ISBN 9780328827428

Mathematics 2

Course Code: 30200

Prerequisites: None

Instruction will promote mathematical processes/thinking, as detailed in the Standards for Mathematical Practice as well as content standards for Operations and Algebraic Thinking, Number and Operations in Base Ten, Measurement and Data, and Geometry. Specifications for study within the grade level are detailed in the Maryland College and Career Ready Standards. Skills and concepts will include but are not limited to understanding the base-ten numeration system, building fluency with addition and subtraction, using standard units of measure, and describing and analyzing shapes.

Textbook(s): *Envision Math 2.0, Vol 1*, ISBN 9780328827374; *Envision Math 2.0, Vol 2*, ISBN 9780328827435

Mathematics 3

Course Code: 30300

Prerequisites: None

Instruction will promote mathematical processes/thinking, as detailed in the Standards for Mathematical Practice as well as content standards for Operations and Algebraic Thinking, Number and Operations in Base Ten, Number and Operations Fractions, Measurement and Data, and Geometry. Specifications for study within the grade level are detailed in the Maryland College and Career Ready Standards. Skills and concepts will include but are not limited to developing an understanding of basic multiplication and division within 100, understanding the structure of rectangular arrays, fractions and unit fractions and describing properties of two-dimensional shapes.

Textbook(s): Envision Math 2.0, Vol 1, ISBN 9780328827381; Envision Math 2.0, Vol 2, ISBN 9780328827442

Mathematics 4

Course Code: 30400

Prerequisites: None

Instruction will promote mathematical processes/thinking, as detailed in the Standards for Mathematical Practice as well as content standards for Operations and Algebraic Thinking, Number and Operations in Base Ten, Number and Operations Fractions, Measurement and Data, and Geometry. Specifications for study within the grade level are detailed in the “Maryland College and Career Ready Standards”. Skills and concepts will include but are not limited to developing understanding and fluency for multi-digit multiplication and division, developing an understanding of fraction equivalence, computing with fractions and analyzing geometric properties.

Textbook(s): Envision Math 2.0, Vol 1, ISBN 9780328827398; Envision Math 2.0, Vol 2, ISBN 9780328827459

Mathematics 5

Course Code: 30500

Prerequisites: None

Instruction will promote mathematical processes/thinking, as detailed in the Standards for Mathematical Practice as well as content standards for Operations and Algebraic Thinking, Number and Operations in Base Ten, Number and Operations Fractions, Measurement and Data, and Geometry. Specifications for study within the grade level are detailed in the “Maryland College and Career Ready Standards”. Skills and concepts will include but are not limited to developing fluency with adding and subtracting fractions, developing an understanding of multiplication and division of fractions, extending computation to include decimal numbers, and developing an understanding of volume.

Textbook(s): Envision Math 2.0, Vol 1, ISBN 9780328827404; Envision Math 2.0, Vol 2, ISBN 9780328827446

Mathematics 6

Course Code: 307603

Prerequisites: *Completion of Grade 5 Mathematics*

Credits: 1.0

This course begins the transition from the heavy emphasis on number and operations at the elementary school level towards a more formalized understanding of mathematics that occurs at the high school level. Students connect previous knowledge of multiplication, division, and fractions

to ratios and proportional relationships; extend previous understanding of the number system and operations to fractions and negative numbers; apply and extend previous understandings of the number line to plot coordinate pairs on a Cartesian plane; formalize algebraic thinking into algebraic expressions and equations; apply their previous knowledge of geometry in real-world and mathematics situations; and begin to develop understanding of statistical variability and distributions. As in all mathematics courses, the Mathematical Practice Standards apply throughout each course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations.

Textbook(s): *Big Ideas Math (Green)*, ISBN 9781608402267

Mathematics 6 Co-Teach

Course Code: 307673

Prerequisites: Completion of Grade 5 Mathematics

Credits: 1.0

This course begins the transition from the heavy emphasis on number and operations at the elementary school level towards a more formalized understanding of mathematics that occurs at the high school level. Students connect previous knowledge of multiplication, division, and fractions to ratios and proportional relationships; extend previous understanding of the number system and operations to fractions and negative numbers; apply and extend previous understandings of the number line to plot coordinate pairs on a Cartesian plane; formalize algebraic thinking into algebraic expressions and equations; apply their previous knowledge of geometry in real-world and mathematics situations; and begin to develop understanding of statistical variability and distributions. As in all mathematics courses, the Mathematical Practice Standards apply throughout each course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations. This course is designed to facilitate learning outcomes to meet the needs of diverse learners through curriculum modifications and accommodations as appropriate.

Textbook(s): *Big Ideas Math (Green)*, ISBN 9781608402267

Mathematics 6 Intensive

Course Code: 307683

Prerequisites: Completion of Grade 5 Mathematics; IEP

Credits: 1.0

This course begins the transition from the heavy emphasis on number and operations at the elementary school level towards a more formalized understanding of mathematics that occurs at the high school level. Students connect previous knowledge of multiplication, division, and fractions to ratios and proportional relationships; extend previous understanding of the number system and operations to fractions and negative numbers; apply and extend previous understandings of the number line to plot coordinate pairs on a Cartesian plane; formalize algebraic thinking into algebraic expressions and equations; apply their previous knowledge of geometry in real-world and mathematics situations; and begin to develop understanding of statistical variability and distributions. As in all mathematics courses, the Mathematical Practice Standards apply throughout each course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations. This course is designed to facilitate learning outcomes appropriate to the instructional needs of the student, as identified on the Individualized Education Plan (IEP). Course content is designated by the student's Individualized Education Plan (IEP).

Textbook(s): *Big Ideas Math (Green)*, ISBN 9781608402267

Mathematics 6 Supported Inclusion

Course Code: 307633

Prerequisites: Completion of Grade 5 Mathematics 1.0

This course begins the transition from the heavy emphasis on number and operations at the elementary school level towards a more formalized understanding of mathematics that occurs at the high school level. Students connect previous knowledge of multiplication, division, and fractions to ratios and proportional relationships; extend previous understanding of the number system and operations to fractions and negative numbers; apply and extend previous understandings of the number line to plot coordinate pairs on a Cartesian plane; formalize algebraic thinking into algebraic expressions and equations; apply their previous knowledge of geometry in real-world and mathematics situations; and begin to develop understanding of statistical variability and distributions. As in all mathematics courses, the Mathematical Practice Standards apply throughout each course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations. This course is designed to occur in a small class environment and will incorporate instructional practices and strategies based on student learning styles and individual needs.

Textbook(s): *Big Ideas Math (Green)*, ISBN 9781608402267

Accelerated Mathematics 1

Course Code: 308693

Prerequisites: Successful completion of Grade 5 Mathematics; Students who meet the following criteria are likely to be successful in Accelerated 1:

Score of 80 or above on Math 5 SLO Post Test

Score of 740 or above on most current Math PARCC

Score of 211 or above on MAP-R

Grades of A or B with respect to current performance in mathematics

*Optional assessment available in Performance Matters, if additional data is needed.
(Accelerated 1 Placement Test)*

Teacher recommendation with respect to study habits and attitude toward the study of mathematics as shown in following checklist:

Mastery of basic skills using whole numbers

Strong conceptual understanding of operations with fractions

Ability to problem solve in multiple ways

Ability to work with mathematical concepts fluent, flexible, and creative ways

Consistently demonstrates Standards for Mathematical Practice

Exhibits energy and persistence in solving difficult problems

Credits: 1.0 Weighted

This course begins the transition from the heavy emphasis on number and operations at the elementary school level towards a more formalized understanding of mathematics that occurs at the high school level. Students connect previous knowledge of multiplication, division, and fractions to ratios and proportional relationships; extend previous understanding of the number system and operations to fractions and negative numbers; apply and extend previous understandings of the number line to plot coordinate pairs on a Cartesian plane; formalize algebraic thinking into algebraic expressions and equations; apply their previous knowledge of geometry in real-world and mathematics situations; and begin to develop understanding of statistical variability and distributions. As in all mathematics courses, the Mathematical Practice Standards are woven throughout the course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations. Students will take the Grade 6 PARCC Assessment. The Honors curriculum can not be delivered to students in a pull-out format if students are to receive the weighted credit.

Textbook(s): *Big Ideas Math Advanced 1*, ISBN 9781608405268

MONTESSORI

Montessori Primary Art

Course Code: 86010

Prerequisites: None

The curriculum provides various art experiences that allow students to identify, describe and interpret observed forms. Students have opportunities to create images and forms from observation, memory, imagination and feelings. Students also observe and describe artworks using art vocabulary to express personal responses. Group activities are a part of this course.

Textbook(s): *Explorations in Art* ebook, Davis Publications

Montessori Primary Geography

Course Code: 96060

Prerequisites: None

Students begin to learn the basic concepts of geography. Using their observations in school and in their community, students describe how people of different cultural backgrounds interact cooperatively, meet human needs and contribute to the community. Students begin to use geographic tools such as globes and maps of the continents and countries to locate places they live in or come from. They learn about geographic characteristics used to describe places and how these characteristics influence how people live and work. Geography is first presented as an extension of the sensorial and language activities. History is presented through stories of holidays, birthdays and historic events, and through cultural activities.

Textbook(s): Montessori materials

Montessori Primary Health

Course Code: 87410

Prerequisites: None

Health education for young students focuses on what they can do to promote good health and well-being, making clear connections to their immediate environment and health information, concepts, skills, and behaviors. Central themes in primary Health Education are the acceptance of personal responsibility for lifelong health, respect for and promotion of the health of others, an understanding of the process of growth and development, and informed use of health-related information, products, and services.

Textbook(s): Children's Health Market, The Great Body Shop

Montessori Primary Language Arts

Course Code: 81310

Prerequisites: None

Students learn to express thoughts and ideas through many aspects of the environment, which are created for spontaneous interest in learning how to read. Children are taught to listen for and recognize the individual phonetic sounds in words. They explore deciphering written words through recognition of patterns. They are also introduced to literature by reading aloud a wide range of classic stories and poetry. Opportunities to practice reading occur across the curriculum.

Textbook(s): Montessori materials

Montessori Primary Mathematics

Course Code: 83010

Prerequisites: None

Montessori instruction promotes mathematical thinking processes (problem solving, reasoning, communications, and representation) as the mathematics Content Standards of numeration, pre-algebra, geometry, measurement, data, and probability are taught as appropriate for the multi-age levels. Math concepts are introduced and practiced using hands-on activities. Children receive a solid foundation for understanding mathematical principles, and a structured transition from concrete to abstract reasoning and number symbols one to ten. They are exposed to the place value rules of the decimal numeration system through interaction with manipulative math materials. Students use higher-order thinking skills to solve problems in relation to a variety of challenges, from practical money transactions to algebraic relationships; and explore in-depth numbers, properties, simple equations, higher measurement, computer calculation and graphics, geometric proofs, fractions, word problems and pre-algebraic equations.

Textbook(s): Montessori materials

Montessori Primary Music

Course Code: 86210

Prerequisites: None

The Vocal and General Music Program of Instruction provides all students with appropriate resources and experiences to develop positive attitudes and sensitivities toward music. Through the implementation of sequential musical skills and concepts students develop an understanding of the intrinsic value of music and its relationship to diverse cultures, traditions, values and beliefs. The Program is also designed to foster enjoyment and appreciation of music beyond the limits of classroom instruction.

Textbook(s): Determined by the school

Montessori Primary Physical Education

Course Code: 87710

Prerequisites: None

The physical education program is based on the Maryland Physical Education Content Standards and the Maryland State Curriculum that includes skillfulness, exercise physiology, biomechanical principles, social psychological principles, motor learning, and physical activity appropriate to the multi-age levels. The emphasis is on space awareness and self space awareness. Students will be introduced to and demonstrate locomotor and non-locomotor skills. Students will refine these skills. Students will be introduced to and participate in a variety of fitness development exercises. Students will learn to manipulate objects with purposeful movement (throwing, catching, striking, kicking, bouncing, and rolling). Students will learn playground rules and safety for self and others.

Textbook(s): PGCPs Curriculum documents and resources

Montessori Primary Practical Life

Course Code: 88010

Prerequisites: None

The challenge of the child from birth through age six is to complete the formation and refinement of the physical body. A child-sized environment is designed that gives children the opportunity to engage their whole bodies in exercise which perfects now one movement, now another. The primary classroom has materials for washing, pouring, measuring, sweeping, tying laces, buttoning,

table setting, and a host of other real-life, child-sized work areas.

Textbook(s): Montessori materials

Montessori Primary Science

Course Code: 84010

Prerequisites: None

Primary science students actively engage in learning to view the world scientifically. This course is woven into sensorial, practical life and language activities. Children learn to observe, identify and classify as they care for classroom plants and animals. Nature walks offer opportunities to explore the physical properties of natural and artificial objects. Concepts such as magnetism and buoyancy are explored through class experiments. Students learn science through stories, songs, visual media, exploration and manipulation thus giving them an opportunity to experience science through their senses. Scientific vocabulary enrichment activities prepare the children to collect, observe, organize, record and interpret scientific information. Students are encouraged to analyze and evaluate their findings as they appease their natural curiosity for knowledge.

Textbook(s): Montessori materials

Montessori Primary Sensorial

Course Code: 81300

Prerequisites: None

This course is aimed at the training and sharpening of the senses (tactile, auditory, visual, olfactory, and gustatory). The course focuses on exercises in perception, observation, fine discrimination, and classification. Refinement of the sense of sound paves the way for the child's emergence into language. Sensorial education also builds a foundation for mathematical knowledge and the ability to make precise observations of the natural world in science. Students will learn about but not limited to artistic, architectural and musical appreciation.

Textbook(s): Montessori materials

Montessori Primary Social Development

Course Code: 96010

Prerequisites: None

Social development reflects the level of student behavior that is conducive to a safe and orderly environment for all. Social development will include but is not limited to the degree by which a student is able to follow directions, show respect for others, deal with problems in a positive manner, follow classroom rules and routines, accept responsibility for his/her own actions, cooperate with adults/peers. This course provides primary children before age six a sensorial relationship to their environment. Learning through their senses, three to six year old children strive to sort out all the impressions they receive as they work to acquire coordination, concentration, order and independence.

Textbook(s): Montessori materials

Montessori Primary Social Skills

Course Code: 89210

Prerequisites: None

Students will learn about cooperating with classroom rules/routines, relating well with adults and peers, participating willingly in group situations, making transitions from one activity to another, resolving conflicts appropriately and showing appreciation, empathy and caring for others. Students

are also taught safety and classroom rules that are meant to keep them safe. Montessori teachers introduce students to peace education and “Grace and Courtesy” lessons, thus giving them the tools for appropriate social interactions.

Textbook(s): Montessori materials

Montessori Primary Social Studies

Course Code: 82010

Prerequisites: None

Students begin to learn the basic concepts of Social Studies. Using their observations in school and in their community, students describe how people of different cultural backgrounds interact cooperatively, meet human needs and contribute to the community. Students also examine events, photographs, objects, and written text to describe differences between the past and present and how individuals and societies change over time.

Textbook(s): Montessori materials

Montessori Primary Spanish

Course Code: 81210

Prerequisites: None

General Spanish is taught to students in the Montessori primary classrooms. The purpose of the Spanish program is to guide students to acquire language in the most natural way. The emphasis is on acquiring and applying Spanish vocabulary to classroom activities and everyday life. Cultural awareness is also a component.

Textbook(s): Montessori materials and resources

Montessori Primary Work Habits

Course Code: 89010

Prerequisites: None

Work habits reflect students' ability to manage classroom time effectively. The work habits will include, but is not limited to the degree by which a student is able to organize their materials, use classroom materials appropriately, stay on task, work independently when appropriate, work cooperatively with classmates when appropriate, submit work in timely manner, follow both written and oral directions, and actively participate in classroom content discussions/work. Children will learn to work independently, in small, collaborative groups, and as a whole class community. The logical, sequential nature of the environment guides discovery and stimulates both creative thinking and thoughtful analysis. The key to student work is the freedom to choose his/her own work. Freedom of choice helps students to take ownership of their own learning thus creating autonomy in the classroom.

Textbook(s): Montessori materials

Montessori Lower Elementary Art

Course Code: 86020

Prerequisites: None

The curriculum provides various art experiences that allow students to identify, describe and interpret observed forms and to describe the similarities. Students have opportunities to create images and forms from observation, memory, imagination and feelings. Students also observe and develop criteria for judging artworks using art vocabulary. Art standards are taught through activities based on the elements of art and principles of design. Students have opportunities to experiment

with art media, processes and techniques to generate ideas and express personal meaning.

Textbook(s): *Explorations in Art* by Stewart and Katter, Davis Publications

Montessori Lower Elementary Health

Course Code: 87420

Prerequisites: Primary Montessori enrollment

In lower elementary Health Education, students will learn how to care for their bodies, communicate effectively and positively contribute as members of their classroom and families, identify health resources in the community, practice safe behaviors, prevent common accidents, respond to emergencies, distinguish between helpful and harmful substances, know how to make healthy food choices, participate in active play and get sufficient sleep, understand the stages of the life cycle, recognize symptoms of common illnesses and practice good personal hygiene to prevent the spread of disease.

Textbook(s): Children's Health Market, The Great Body Shop

Montessori Lower Elementary Language Arts

Course Code: 81320

Prerequisites: Primary Montessori enrollment

Students learn to decode words and read grade level text accurately at an adequate rate. Pre-, mid-, and post- reading strategies are introduced to help with comprehension. Reading comprehension through the use of learned tools and tactics remain the core objective of this course. Critical thinking is developed through high order questions which focus on story, plot, characters and scene; this course unfolds the process of reading and writing with the exploration of grammar, functions of words and spellings.

Textbook(s): Montessori materials

Montessori Lower Elementary Mathematics

Course Code: 83020

Prerequisites: Primary Montessori enrollment

Instruction will promote mathematical processes/thinking, (problem solving, reasoning, communication, connections, and representation) as the mathematics Content Standards of numeration, algebra, geometry, measurement, data, and probability are taught as appropriate for the grade level. The curriculum is presented with concrete materials that simultaneously reveal arithmetic, geometric, and algebraic correlations. Abstract math concepts are introduced through concrete Montessori materials. Students are able to progress through the curriculum working independently and in small groups.

Textbook(s): Montessori materials

Montessori Lower Elementary Music

Course Code: 86220

Prerequisites: Montessori Primary Music

The Vocal and General Music Program of Instruction provides all students with appropriate resources and experiences to develop positive attitudes and sensitivities toward music. Through the implementation of sequential musical skills and concepts students develop an understanding of the intrinsic value of music and its relationship to diverse cultures, traditions, values and beliefs. The Program is also designed to foster enjoyment and appreciation of music beyond the limits of

classroom instruction.

Textbook(s): Determined by the school

Montessori Lower Elementary Physical Education

Course Code: 87720

Prerequisites: Primary Montessori enrollment

The physical education program is based on the Maryland Physical Education Content Standards and the Maryland State Curriculum that includes skillfulness, exercise physiology, biomechanical principles, social psychological principles, motor learning, and physical activity appropriate to the multi-age levels. Students will learn to work cooperatively with a partner. They will learn to manipulate objects with a partner (throwing, catching, striking, kicking, bouncing, and rolling). Students will demonstrate the correct techniques for using manipulative including throwing, catching, striking, and dribbling. Student will learn to analyze their performance in order to learn or improve a movement skill. Students will learn fitness concepts and participate in a variety of fitness development exercises, and learn to assess their personal fitness. Working in small groups, students will learn to accept personal differences (maturity levels, physical differences, physical cultures, and gender differences).

Textbook(s): PGCPs Curriculum documents and resources

Montessori Lower Elementary Practical Life

Course Code: 88020

Prerequisites: Primary Montessori enrollment

Practical life exercises are designed to help the child gain a sense of order, to develop coordination and concentration and to foster independence. Practical life exercises essentially provide the blueprint of life and emphasize building fine motor skills and increasing attention spans associated with daily living activities.

Textbook(s): Montessori materials

Montessori Lower Elementary Science

Course Code: 84020

Prerequisites: Primary Montessori enrollment

Students observe carefully, measure things with more accuracy, record data in science notebooks and communicate their results in charts and simple graphs, as well as in prose. This course is a presentation of the formal scientific language of zoology, botany, anthropology, geography, geology, etc., exposing the child to accurate, organized information and respecting the child's intelligence and interests. A focus on the interdependency of life and the earth is a common thread through the course. Students employ the five "E" (engage, explore, explain, elaborate and evaluate) to experience science in and out of their classroom.

Textbook(s): Montessori materials

Montessori Lower Elementary Social Skills

Course Code: 89220

Prerequisites: Primary Montessori enrollment

This course focuses on building community skills such as working as a part of a group, forming good relationships with adults and peers, taking turns and sharing fairly, and understanding that there is a need to have community values. A focus on respect for all humanity includes study of codes of behavior for different groups of people and understanding that people have different

needs, views, cultures, and beliefs, which need to be treated with respect. Personal skills are reinforced with instruction in cooperating with classroom rules/routines, participating willingly in group situations, making transitions from one activity to another, resolving conflicts appropriately, and showing appreciation, empathy and caring for others through the use of the Montessori Peace Curriculum.

Textbook(s): Montessori materials

Montessori Lower Elementary Social Studies

Course Code: 82020

Prerequisites: Primary Montessori enrollment

Students continue to learn the basic concepts of Social Studies. Students learn to employ the use of timelines, pictures, charts, and other visual aids to provide a linguistic and visual overview of the first principles of each discipline. The course extends to a broad arena, including the fundamental needs of humans, introduction to the formation of the Earth, evolution, the unfolding of human civilizations, and history of the country, state or province. Study of evolution and the development of life on the Earth over the eon's ties together the history, geography and science curricula. History also provides the child with role models, and illustrates the indebtedness of our generation to previous generations.

Textbook(s): Montessori materials

Montessori Lower Elementary Spanish

Course Code: 81220

Prerequisites: Primary Montessori enrollment

General Spanish is taught to students in the Montessori lower elementary classrooms. The focus of the program is vocabulary acquisition and natural application as it relates to classroom activities and everyday life. At this level, the development of listening and speaking skills, as well as cultural awareness, will be emphasized.

Textbook(s): Montessori materials and resources

Montessori Lower Elementary Work Habits

Course Code: 89020

Prerequisites: Primary Montessori enrollment

Work habits reflect students' ability to manage classroom time effectively and efficiently. The work habits course will include, but is not limited to the degree by which a student is able to organize their materials, use classroom materials appropriately, stay on task, work independently when appropriate, work cooperatively with classmates when appropriate, submit work in timely manner, follow both written and oral directions, and actively participate in classroom content discussions/work.

Textbook(s): Montessori materials

Montessori Upper Elementary Art

Course Code: 86030

Prerequisites: Lower Montessori enrollment

The curriculum provides various art experiences that allow students to identify, describe and interpret observed forms and to analyze ways that art elements are used in artworks. Students have opportunities to compose and render from observations of subject matter. Students also observe and develop criteria for judging artworks using art vocabulary, as well as differentiate works by

others of various cultures and time periods. Art standards are taught through activities based on the elements of art and principles of design. Students have opportunities to experiment with art media, processes and techniques to generate ideas and express personal meaning. Appropriate use of materials and tools is taught.

Textbook(s): *Explorations in Art* by Stewart and Katter, Davis Publications

Montessori Upper Elementary Chorus

Course Code: 86330

Prerequisites: Lower Montessori enrollment

The teacher through careful selection of repertoire, attention to instructional guidelines and by encouraging expressive singing will help children gain an understanding and appreciation for aesthetic choral singing. Instructional objectives are designed to assist students in achieving choral skills and musicianship. Students participating in chorus will learn to sing with a freely produced tone characteristic of their age, sing with controlled breathing, sing with correct diction, sing in tune with other voices and instruments, sing in balance with other voices and instruments, respond appropriately to choral direction, sing in parts independently, interpret a choral composition verbally and through performance.

Textbook(s): Determined by the school

Montessori Upper Elementary General Music

Course Code: 86230

Prerequisites: Montessori Lower Elementary Music

The Vocal and General Music Program of Instruction provides all students with appropriate resources and experiences to develop positive attitudes and sensitivities toward music. Through the implementation of sequential musical skills and concepts students develop an understanding of the intrinsic value of music and its relationship to diverse cultures, traditions, values and beliefs. The Program is also designed to foster enjoyment and appreciation of music beyond the limits of classroom instruction.

Textbook(s): Determined by the school

Montessori Upper Elementary Health

Course Code: 87430

Prerequisites: Lower Montessori enrollment

Health Education for upper elementary students focuses on how they can assume more responsibility for their health, develop positive health behaviors, and prevent negative, unhealthy behaviors. Students will learn to practice safe behaviors, identify hazards and actions to remove those hazards from their surroundings, respond to emergencies, and develop conflict resolution skills, identify effects of drugs on the body, understand influences that promote drug use, and develop the skills needed to resist those influences. Note: After age 10 or the equivalent of 5th and 6th grade students will recognize treatments of major communicable and non-communicable diseases and practice good hygiene to prevent the spread of disease. The anatomy and physiology of the reproductive system will be introduced. Students will acquire, develop and refine their health related knowledge skills, attitudes, and behaviors.

Textbook(s): Montessori materials

Montessori Upper Elementary Language Arts

Course Code: 81330

Prerequisites: Lower Montessori enrollment

This course is designed for the student to develop confidence with self-expression, by utilizing the seminars, oral presentations, debates, drama, video, photography, essays, play-writing, poetry, and short stories; it also explores related accounts of historical and philosophical material through literature utilizing components of style, genre, characterization, interpretation, and the art of discussion. Reading and writing strategy instruction focuses on literary and informational texts, as well as success in real world applications. Students are introduced to various genres of literature and encouraged to demonstrate their own creativity through art, literature and music.

Textbook(s): Montessori materials

Montessori Upper Elementary Mathematics

Course Code: 83030

Prerequisites: Lower Montessori enrollment

Instruction will promote mathematical processes/thinking, (problem solving, reasoning, communication, connections, and representation) as the mathematics Content Standards of numeration, algebra, geometry, measurement, data, and probability are taught as appropriate for the grade level. The student uses higher-order thinking skills to solve problems in relation to a variety of challenges, from practical money transactions to algebraic relationships; explores in-depth numbers, properties, simple equations, higher measurement, computer calculation and graphics, geometric proofs, and algebraic equations. Students gain understanding of the concrete meaning of the abstract language of mathematics through daily experiences. Students apply the knowledge gained in lower elementary to increasingly complex and abstract problems.

Textbook(s): Montessori materials

Montessori Upper Elementary Physical Education

Course Code: 87730

Prerequisites: Lower Montessori enrollment

The physical education program is based on the Maryland Physical Education Content Standards and the Maryland State Curriculum that includes skillfulness, exercise physiology, biomechanical principles, social psychological principles, motor learning, and physical activity appropriate to the multi-age levels. The program components embedded throughout all instruction are fitness and conditioning, coordination, throwing and catching, striking, speed, timing and accuracy, leisure and recreational games as well as rhythm conditioning, strengthening, rules, cooperation and sportsmanship are taught, along with basic skills in a variety of activities.

Textbook(s): Curriculum documents, Montessori materials

Montessori Upper Elementary Practical Life

Course Code: 88030

Prerequisites: Lower Montessori enrollment

Children take on more personal responsibility for work and managing the classroom. The self care skills developed in primary and lower elementary are expanded to care for the classroom and school community in upper elementary.

Textbook(s): Montessori materials

Montessori Upper Elementary Science

Course Code: 84030

Prerequisites: Lower Montessori enrollment

Science students develop an understanding of conducting good inquiry-based investigations. Students learn from hands-on activities, teacher demonstrations, cooperative learning, and independent, small group, and whole group experiences. The student integrates history utilizing themes from earlier studies in natural and cultural history, including interdependency, evolution, life cycles, matter and energy, behavior and culture, mental health, physical health, agriculture, government, manufacturing, communication, world systems, earth preservation, and so on, in the context of social responsibility and governance. Primary readings from each historical period are emphasized.

Textbook(s): Montessori materials

Montessori Upper Elementary Social Skills

Course Code: 89230

Prerequisites: Lower Montessori enrollment

Social skills reflect the level of student behavior that is conducive to a safe and orderly environment for all. This social skills grade will include but is not limited to the degree by which a student is able to follow directions, show respect for others, deal with problems in a positive manner, follow classroom rules and routines, accept responsibility for his/her own actions, cooperate with adults/peers.

Textbook(s): Montessori materials

PHYSICAL EDUCATION

Physical Education Pre K

Course Code: 97070

Prerequisites:

The emphasis is on general space awareness and self space awareness. Students will be introduced to and demonstrate locomotor and non-locomotor skills. Students will participate in a wide variety of activities in order to refine these skills. Students will be introduced to and participate in a variety of fitness development exercises. Students will learn playground rules and safety for self and others.

Textbook(s): None

Physical Education Kindergarten

Course Code: 98070

Prerequisites: None

The emphasis is on how students move in their environment. Students learn fundamental locomotor (running, hopping, skipping, jumping, leading, sliding, galloping), nonlocomotor (bending, twisting, turning, rocking, swaying, balancing, stretching, pushing, and pulling), and manipulative (rolling, throwing, catching, bouncing, kicking) skills. Students participate in a wide variety of activities that involve locomotor, nonlocomotor and manipulative skills, fitness concepts and fitness development exercises. Students participate in a variety of movement activities leading to experiences of personal feelings of success.

Textbook(s): None

Physical Education First Grade

Course Code: 71100

Prerequisites: None

The emphasis is on moving through space and time. Students learn to demonstrate the qualities of movement (space, time, force, flow, levels, directions, and pathways) as they perform a variety of fundamental locomotor (running, hopping, skipping, jumping, leading, sliding, galloping) and nonlocomotor (bending, twisting, turning, rocking, swaying, balancing, stretching, pushing, and pulling) skills. Students learn to manipulate objects with purposeful movement (throwing, catching, striking, kicking, bouncing, and rolling). Students participate in a variety of fitness development exercises. Students learn playground rules and safety for self and others.

Textbook(s): None

Physical Education Second Grade

Course Code: 71200

Prerequisites: None

The emphasis is on how students move with one another in space. Students learn to work cooperatively with a partner. They learn to demonstrate the qualities of movement (space, time, force, flow, levels, directions, and pathways) as they perform a variety of fundamental locomotor (running, hopping, skipping, jumping, leading, sliding, galloping) and nonlocomotor (bending, twisting, turning, rocking, swaying, balancing, stretching, pushing, and pulling) skills. Students learn to manipulate objects with a partner (throwing, catching, striking, kicking, bouncing, and rolling), fitness concepts, a variety of fitness development exercises, and playground rules related to the use of equipment, safety and games.

Textbook(s): None

Physical Education Third Grade

Course Code: 71300

Prerequisites: None

The emphasis is on how students react and respond to others and perform well-defined combinations of movements. Students learn to develop patterns and combinations of movements using locomotor and non-locomotor skills. Students continue to learn to manipulate objects with a partner (throwing, catching, striking, and kicking). Students continue to learn fitness concepts and participate in a variety of fitness development exercises. Students learn playground rules related to the use of equipment, safety and games.

Textbook(s): None

Physical Education Fourth Grade

Course Code: 71400

Prerequisites: None

The emphasis is on manipulating objects in and through space. Students learn to demonstrate the correct techniques for using manipulatives including throwing, catching, striking, kicking, trapping, and dribbling. Students learn to analyze their performance in order to learn or improve a movement skill. Students continue to learn fitness concepts, participate in a variety of fitness development exercises, and learn to assess their personal fitness. Working together as part of a group, students learn to appreciate personal differences and value the rights of others.

Textbook(s): None

Physical Education Fifth Grade

Course Code: 71500

Prerequisites: None

The emphasis is on manipulating objects with accuracy and speed. Students continue to learn the correct techniques for using manipulatives including throwing, catching, striking, kicking, trapping, and dribbling. Students continue to learn fitness concepts, participate in a variety of fitness development exercises, assess their personal fitness, compare their scores to a health related standard, and set goals for improvement or maintenance. Working in small groups, students learn to accept personal differences (maturity levels, physical differences, physical abilities, cultures, and gender differences).

Textbook(s): None

Physical Education Sixth Grade

Course Code: 71600

Prerequisites: None

The focus of this course is the development of movement skill combinations and movement skill knowledge; the assessment and maintenance of physical fitness to improve health and performance, and the requisite knowledge of physical fitness concepts, principles and strategies; and the application of psychological and sociological concepts, including self-responsibility, positive social interaction, and group dynamics, in the learning and performance of physical activity.

PREKINDERGARTEN

Approaches to Learning PreK

Course Code: 97080

Prerequisites: None

This domain enhances the student's ability to make appropriate choices, demonstrate an eagerness to learn, accept responsibility for learning, persevere in a task, evaluate own work and use their imagination, creativity and invention as part of their learning strategies.

Textbook(s): None

Language & Literacy PreK

Course Code: 97010

Prerequisites: None

This domain focuses on early reading skills including but not limited to: listening for a variety of purposes, speaking distinctly in complete sentences, demonstrating book handling skills, oral language, vocabulary development, alphabet knowledge, phonological awareness, understanding that print conveys meaning and displaying an interest in using writing tools.

Textbook(s): None

Mathematical Thinking PreK

Course Code: 97030

Prerequisites: None

This domain provides a mathematical foundation including but not limited to: recognizing and extending patterns, sorting and describing objects by attributes, counting objects with one to one correspondence, recognizing numerals, ordering and describing objects, using positional terms, using non-standard units to measure and making simple graphs.

Textbook(s): None

Scientific Thinking PreK

Course Code: 97040

Prerequisites: None

This domain offers students a chance to gain and apply knowledge using the senses to explore, describe and learn, investigate, compare and contrast similarities and differences in their environment.

Textbook(s): None

Social and Emotional Development PreK

Course Code: 97090

Prerequisites: None

This domain focuses on cooperating with classroom rules/routines, relating well with adults and peers, participating willingly in group situations, making transitions from one activity to another, resolving conflicts appropriately and showing appreciation, empathy and caring for others.

Textbook(s): None

Social Studies PreK

Course Code: 97020

Prerequisites: None

This domain focuses on social development skills including but not limited to examining the need for rules, roles and responsibilities of workers, and recognizing similarities and differences in self and others.

Textbook(s): None

Technology PreK

Course Code: 97050

Prerequisites: None

In this domain, students are encouraged to use computers and calculators as an integral part of their learning experience.

Textbook(s): None

READING/ENGLISH LANGUAGE ARTS

Literacy Kindergarten

Course Code: 98010

Prerequisites: None

Strategies for comprehension are taught to students. Understanding is facilitated through the listening to and reading of literature and informational texts. Letters are identified along with the sounds they make.

Textbook(s): *Reading Wonders (Gr. K)*, McGraw-Hill ISBN 9780021188680

Oral and Written Language Kindergarten

Course Code: 98080

Prerequisites: None

Students learn to express thoughts and ideas through work with words and pictures. Basic rules of grammar are introduced. Clear and audible speech is taught, and students learn to participate in collaborative conversations.

Textbook(s): *Reading Wonders (Gr. K)*, McGraw-Hill ISBN 9780021188680

Instructional Resource(s): *Writing Fundamentals Units of Study (Gr. K)*

Oral & Written Communication 1

Course Code: 12100

Prerequisites: None

Students continue to develop the strategies used in the organization and delivery of oral presentation and collaborative conversations. The written portion of the course focuses the writing process with products that address a variety of purposes. Attention is given to spelling and handwriting mechanics.

Textbook(s): *Reading Wonders (Gr. 1)*, ISBN 9780021196524

Instructional Resource(s): *Writing Fundamentals (Gr. 1) Units of Study*

Oral & Written Communication 2

Course Code: 12200

Prerequisites: None

Students continue learning the writing process and skills for oral presentation and collaborative conversations begun in Oral & Written Communication 1.

Textbook(s): *Reading Wonders (Gr. 2)*, ISBN 9780021188673

Instructional Resource(s): *Writing Fundamentals (Gr. 2) Units of Study*

Oral & Written Communication 3

Course Code: 12300

Prerequisites: None

Students are introduced to more sophisticated writing techniques and required to produce more complex writing that reflects more elaborate understanding of author's craft. Students continue to develop skills for oral presentation and collaborative conversation. In addition, students begin to routinely respond to texts in written form.

Textbook(s): *Reading Street Common Core 3.1*, ISBN 9780328724512, *Reading Street Common Core 3.2*, ISBN 9780328724529

Instructional Resource(s): *Writing Fundamentals (Gr. 3) Units of Study*

Oral & Written Communication 4

Course Code: 12400

Prerequisites: None

Students continue to practice and fine-tune writing techniques while producing writing of various text types. Students continue to develop skills for oral presentation and collaborative conversation. In addition to routinely responding to texts, students are required to draw evidence from text to support analysis, reflection, and research in their writing.

Textbook(s): *Reading Street Common Core (Gr. 4)*, Pearson 4.1 ISBN 9780328724536 4.2 ISBN 9780328724543

Instructional Resource(s): *Writing Fundamentals (Gr. 4)* Units of Study

Oral & Written Communication 5

Course Code: 12500

Prerequisites: None

Students writing should reflect all of the elements of effective writing taught previously. Deliberate organization, word choice, research, task, audience, and purpose should be evident in student writing. Students continue to routinely respond to texts and draw evidence from texts to support analysis, reflection, and research in their writing.

Textbook(s): *Reading Street Common Core (Gr. 5)*, Pearson 5.1 ISBN 9780328724567 5.2 ISBN 9780328724550

Reading 1

Course Code: 13100

Prerequisites: None

Students read a variety of appropriately leveled texts across genres and text types. Letters are identified along with the sounds they make in accordance with the grade level Foundational Skills. Reading strategies are reinforced to aid in comprehension.

Textbook(s): *Reading Wonders (Gr. 1)*, ISBN 9780021196524

Reading 2

Course Code: 13200

Prerequisites: None

Students continue to read a variety of appropriately leveled texts across genres and text types. Students learn to decode words and read text accurately at an adequate rate according to grade level Foundational Skills. Reading strategies are reinforced to aid in comprehension.

Textbook(s): *Reading Wonders (Gr. 2)*, McGraw-Hill ISBN 9780021293544

Reading 3

Course Code: 13300

Prerequisites: None

Students continue to read a variety of appropriately leveled texts across genres and text types. Reading strategies are reinforced to aid in comprehension. Students analyze the key ideas and details, craft and structure, and integration of knowledge and ideas in a wide range of literature and informational texts of increasing grade-appropriate complexity.

Textbook(s): *Reading Street Common Core (Gr. 3)*, Pearson 3.1 ISBN 9780328724512 3.2 ISBN 9780328724529

Reading 4

Course Code: 13400

Prerequisites: None

Students continue to read a variety of appropriately leveled texts across genres and text types. Reading strategies are reinforced to aid in comprehension. Students analyze the key ideas and details, craft and structure, and integration of knowledge and ideas in a wide range of literature and informational texts of increasing grade-appropriate complexity.

Textbook(s): Reading Street Common Core (Gr. 4), Pearson 4.1 ISBN 9780328724536 4.2 ISBN 9780328724543

Reading 5

Course Code: 13500

Prerequisites: None

Students continue to read a variety of appropriately leveled texts across genres and text types. Reading strategies are reinforced to aid in comprehension. Students analyze the key ideas and details, craft and structure, and integration of knowledge and ideas in a wide range of literature and informational texts of increasing grade-appropriate complexity.

Textbook(s): Reading Street Common Core (Gr. 5), Pearson 4.1 ISBN 9780328724550 4.2 ISBN 9780328724567

Reading/English Language Arts 6

Course Code: 131603

Prerequisites: Reading/English Language Arts 5

This course, designed for sixth graders, focuses on instruction of the Maryland State Curriculum for reading, writing, listening, and speaking. Reading and writing strategy instruction focuses on literary and informational texts, as well as success in real world applications and on PARCC.

Textbook(s): Literature-Common Core Edition ISBN 9780547434537, Language of Literature, Bridges to Literature I, Literature Interactive Reader, Literature English Language, Language Network, Write Source ISBN 9780547485027, novels as assigned

Reading/English Language Arts 6 – Co-Teach

Course Code: 131673

Prerequisites: IEP or Grade 6

This course is designed to facilitate learning outcomes appropriate to the instructional needs of the student. Students access the general education curriculum (see Reading/English Language Arts 6), modified and adapted to meet IEP requirements and the learning needs of struggling readers. This course is designed to facilitate learning outcomes appropriate to the instructional needs of students who can benefit from instructional practices and strategies based on learning styles and individual needs. The general education teacher will teach this class in collaboration with a special educator to ensure that all students have access to the general education curriculum.

Textbook(s): Textbook(s): Literature-Common Core Edition ISBN 9780547434537, Language of Literature, Bridges to Literature I, Literature Interactive Reader, Literature English Language, Language Network, Write Source ISBN 9780547485027, novels as assigned

Reading/English Language Arts 6 – Intensive

Course Code: 131683

Prerequisites: IEP

This course, designed for sixth graders, focuses on instruction of the Maryland State Curriculum for reading, writing, listening, and speaking. Reading and writing strategy instruction focuses on literary and informational text as well as success in real world applications and on PARCC. In addition, modified course content will be delivered in small instructional groupings to diverse learners with disabilities. This course is designed to occur in a small class environment and will incorporate specialized instructional practices and strategies based on student learning styles and individual needs, while implementing appropriate accommodations.

Textbook(s): Textbook(s): *Literature-Common Core Edition* ISBN 9780547434537, *Language of Literature, Bridges to Literature II, Literature Interactive Reader, Literature English Language, Language Network, Write Source* ISBN 9780547485027, novels as assigned

Reading/English Language Arts 6 – Honors

Course Code: 131293

Prerequisites: Student that meets 3 of the 6 following criteria:

A/B average in previous year's R/ELA course

Current or previous MAP-R RIT score for the grade level norm is in the 50 percentile or higher

PARCC ELA score of Level 4 or 5

R/ELA Teacher recommendation and/or advocacy

60% or greater on current or previous year's Reading/Writing SLO assessment

Student desire and motivation, work ethic;

In most cases, students who are identified as TAG will be placed in an Honors course with these exceptions: there is not an interest in taking the course (perhaps domain-specific strength is in Math), student is reading significantly below reading level.

Credits: 1.0 Weighted

This course is designed for identified selected highly able students who have met the prerequisites. The course will further develop student reading and writing skills (see Reading/English Language Arts 6) by enhancing the depth and complexity of the core curriculum. Students will use critical thinking skills in analyzing advanced/above-grade level texts and will be expected to complete rigorous, in-depth writing assignments. The Honors curriculum can not be delivered to students in a pull-out format if students are to receive the weighted credit.

Textbook(s): *Literature-Common Core Edition* ISBN 9780547434537, *Language of Literature, Language Network, Write Source*, novels as assigned

Reading/English Language Arts 6 Supported Inclusion

Course Code: 131633

Prerequisites: Reading/English Language Arts 5

This course, designed for sixth graders, focuses on instruction of the Maryland State Curriculum for reading, writing, listening, and speaking. Reading and writing strategy instruction focuses on literary and informational text as well as success in real world applications and on PARCC. This course is designed to occur in a small class environment and will incorporate instructional practices and strategies based on student learning styles and individual needs.

Textbook(s): *Literature-Common Core Edition*, ISBN 9780547434537; *Language of Literature, Bridges to Literature II, Literature Interactive Reader, Literature English Language, Language Network, Write Source* ISBN 9780547485027, novels as assigned

ESOL

Course Code: 13530

Prerequisites: Qualify for ESOL as determined by Language Proficiency Placement
Course for English Language Learners receiving English for Speakers of Other Languages
Instruction.

Textbook(s): Supplemental support in reading, writing, listening and speaking

Reading Instructional Level

Course Code: 13000

Prerequisites: None

Students are grouped and instructed according to their reading levels. Designations are used to reflect student reading levels: BGL below grade level, OGL for on grade level, AGL for above grade level.

Textbook(s): None

SCIENCE

Science Kindergarten

Course Code: 98040

Prerequisites: None

This course is designed to actively engage kindergarten students in a comprehensive science program as they begin to explore and make sense of the natural world through phenomenon-based instruction. Students will be interacting with content from different topics to include Earth and Space Science (ES), Life Science (LS), Physical Science (PS) and Engineering Design (ETS) Disciplinary Core Ideas (DCIs) from the Next Generation Science Standards (NGSS). Students will develop an understanding of patterns and variations in local weather and the purpose of weather forecasting to prepare for, and respond to, severe weather, apply an understanding of the effects of different strengths or different directions of pushes and pulls on the motion of an object to analyze a design solution, develop understanding of what plants and animals (including humans) need to survive, and the relationship between their needs and where they live. The Crosscutting Concepts (CCCs) of patterns; cause and effect; systems and system models; interdependence of science, engineering, and technology; and influence of engineering, technology, and science on society and the natural world are called out as organizing concepts for these disciplinary core ideas. Students are expected to demonstrate grade-appropriate proficiency with Science and Engineering Practices (SEPs) by asking questions, developing and using models, planning and carrying out investigations, analyzing and interpreting data, designing solutions, engaging in argument from evidence, and obtaining, evaluating, and communicating information. Students will conduct inquiry-based investigations through hands-on, digital and virtual laboratory experiences. Students will be introduced to various STEM careers while in grades K-12.

Textbook(s): *Science Dimensions*. (2017). Orlando, FL: Houghton Mifflin Harcourt.
Digital Resource: *Discovery Education Techbook™*

Science 1

Course Code: 40100

Prerequisites: Grade K Student

First grade science students are actively engaged in a comprehensive science program as they begin to make sense of the natural world through phenomenon-based instruction. Students will be interacting with content from different topics to include Earth and Space Science (ES), Life Science (LS), Physical Science (PS) and Engineering Design (ETS) Disciplinary Core Ideas (DCIs) from the Next Generation Science Standards (NGSS). Students are expected to develop understanding of the relationship between sound and vibrating materials as well as between the availability of light and ability to see objects. The idea that light travels from place to place can be understood by students at this level through determining the effect of placing objects made with different materials in the path of a beam of light. Students are expected to develop understanding of how plants and animals use their external parts to help them survive, grow, and meet their needs as well as how behaviors of parents and offspring help the offspring survive. The understanding is developed that young plants and animals are like, but not exactly the same as, their parents. Students are able to observe, describe, and predict some patterns of the movement of objects in the sky. The Crosscutting Concepts (CCCs) of patterns; cause and effect; structure and function; and influence of engineering, technology, and science on society and the natural world are called out as organizing concepts for these disciplinary core ideas. Students are expected to demonstrate grade-appropriate proficiency with Science and Engineering Practices (SEPs) by asking questions, developing and using models, planning and carrying out investigations, analyzing and interpreting data, designing solutions, engaging in argument from evidence, and obtaining, evaluating, and communicating information. Students will conduct inquiry-based investigations through hands-on, digital and virtual laboratory experiences. Students will be introduced to various STEM careers while in grades K-12.

Textbook(s): *Science Dimensions*. (2017). Orlando, FL: Houghton Mifflin Harcourt.

Digital Resource: *Discovery Education Techbook*™

Science 2

Course Code: 40200

Prerequisites: Grade 1 Student

Second grade science students are actively engaged in a comprehensive science program as they build an understanding to make sense of the natural world through phenomenon-based instruction. Students will be interacting with content from different topics to include Earth and Space Science (ES), Life Science (LS), Physical Science (PS) and Engineering Design (ETS) Disciplinary Core Ideas (DCIs) from the Next Generation Science Standards (NGSS). Students are expected to develop an understanding of what plants need to grow and how plants depend on animals for seed dispersal and pollination. Students are also expected to compare the diversity of life in different habitats. An understanding of observable properties of materials is developed by students at this level through analysis and classification of different materials. Students are able to apply their understanding of the idea that wind and water can change the shape of the land to compare design solutions to show or prevent such change. Students are able to use information and models to identify and represent the shapes and kinds of land and bodies of water in an area and where water is found on Earth. The Crosscutting Concepts (CCCs) of patterns; cause and effect; energy and matter; structure and function; stability and change; and influence of engineering, technology, and science on society and the natural world are called out as organizing concepts for these disciplinary core ideas. Students are expected to demonstrate grade-appropriate proficiency with Science and Engineering Practices (SEPs) by asking questions, developing and using models, planning and carrying out investigations, analyzing and interpreting data, designing solutions, engaging in argument from evidence, and obtaining, evaluating, and communicating information. Students will conduct inquiry-based investigations through hands-on, digital and virtual laboratory experiences. Students will be introduced to various STEM careers while in grades K-12.

Textbook(s): *Science Dimensions*. (2017). Orlando, FL: Houghton Mifflin Harcourt.

Digital Resource: *Discovery Education Techbook*™

Science 3

Course Code: 40300

Prerequisites: Grade 2 Student

Third grade science students are actively engaged in a comprehensive science program as they build an understanding to make sense of the natural world through phenomenon-based instruction. Students will be interacting with content from different topics to include Earth and Space Science (ES), Life Science (LS), Physical Science (PS) and Engineering Design (ETS) Disciplinary Core Ideas (DCIs) from the Next Generation Science Standards (NGSS). Students are able to organize and use data to describe typical weather conditions expected during a particular season. By applying their understanding of weather-related hazards, students are able to make a claim about the merit of a design solution that reduces the impacts of such hazards. Students are expected to develop an understanding of the similarities and differences of organisms' life cycles. An understanding that organisms have different inherited traits, and that the environment can also affect the traits that an organism develops, is acquired by students at this level. In addition, students are able to construct an explanation using evidence for how the variations in characteristics among individuals of the same species may provide advantages in surviving, finding mates, and reproducing. Students are expected to develop an understanding of types of organisms that lived long ago and also about the nature of their environments. Third graders are expected to develop an understanding of the idea that when the environment changes some organisms survive and reproduce, some move to new locations, some move into the transformed environment, and some die. Students are able to determine the effects of balanced and unbalanced forces on the motion of an object and the cause and effect relationships of electric or magnetic interactions between two objects not in contact with each other. They are then able to apply their understanding of magnetic interactions to define a simple design problem that can be solved with magnets. The Crosscutting Concepts (CCCs) of patterns; cause and effect; scale, proportion, and quantity; systems and system models; interdependence of science, engineering, and technology; and influence of engineering, technology, and science on society and the natural world are called out as organizing concepts for these disciplinary core ideas. Students are expected to demonstrate grade-appropriate proficiency with Science and Engineering Practices (SEPs) by asking questions, developing and using models, planning and carrying out investigations, analyzing and interpreting data, designing solutions, engaging in argument from evidence, and obtaining, evaluating, and communicating information. Students will conduct inquiry-based investigations through hands-on, digital and virtual laboratory experiences. Students will be introduced to various STEM careers while in grades K-12. Content from this course will prepare third grade students for the new upcoming Maryland Integrated Science Assessment (MISA) that will be administered in the fifth grade.

Textbook(s): *Science Dimensions*. (2017). Orlando, FL: Houghton Mifflin Harcourt.

Digital Resource: *Discovery Education Techbook™*

Science 4

Course Code: 40400

Prerequisites: Grade 3 Student

Fourth grade science students are actively engaged in a comprehensive science program as they build an understanding to make sense of the natural world through phenomenon-based instruction. Students will be interacting with content from different topics to include Earth and Space Science (ES), Life Science (LS), Physical Science (PS) and Engineering Design (ETS) Disciplinary Core Ideas (DCIs) from the Next Generation Science Standards (NGSS). Students are able to use a model of waves to describe patterns of waves in terms of amplitude and wavelength, and that waves can cause objects to move. Students are expected to develop understanding of the effects of weathering or the rate of erosion by water, ice, wind, or vegetation. They apply their knowledge of natural Earth processes to generate and compare multiple solutions to reduce the impacts of such processes on humans. In order to describe patterns of Earth's features, students analyze and interpret data from maps. Fourth graders are expected to develop an understanding that plants and animals have internal and external structures that function to support survival, growth, behavior, and reproduction. By developing a model, they describe that an object can be seen when light reflected from its surface enters the eye. Students are able to use evidence to construct an explanation of the relationship between the speed of an object and the energy of that object. Students are expected to develop an understanding that energy can be transferred from place to place by sound, light, heat, and electric currents or from object to object through collisions. They apply their understanding of energy to design, test, and refine a device that converts energy from one form to another. The Crosscutting Concepts (CCCs) of patterns; cause and effect; energy and matter; systems and system models; interdependence of science, engineering, and technology; and influence of engineering, technology, and science on society and the natural world are called out as organizing concepts for these disciplinary core ideas. Students are expected to demonstrate grade-appropriate proficiency with Science and Engineering Practices (SEPs) by asking questions, developing and using models, planning and carrying out investigations, analyzing and interpreting data, designing solutions, engaging in argument from evidence, and obtaining, evaluating, and communicating information. Students will conduct inquiry-based investigations through hands-on, digital and virtual laboratory experiences. Students will be introduced to various STEM careers while in grades K-12. Content from this course will prepare fourth grade students for the new upcoming Maryland Integrated Science Assessment (MISA) that will be administered in the fifth grade.

Textbook(s): *Science Dimensions*. (2017). Orlando, FL: Houghton Mifflin Harcourt.

Digital Resource: *Discovery Education Techbook™*

Science 5

Course Code: 40500

Prerequisites: Grade 4 student

Fifth grade science students are actively engaged in a comprehensive science program as they build an understanding to make sense of the natural world through phenomenon-based instruction. Students will be interacting with content from different topics to include Earth and Space Science (ES), Life Science (LS), Physical Science (PS) and Engineering Design (ETS) Disciplinary Core Ideas (DCIs) from the Next Generation Science Standards (NGSS). Students are able to describe that matter is made of particles too small to be seen through the development of a model. Students develop an understanding of the idea that regardless of the type of change that matter undergoes, the total weight of matter is conserved. Students determine whether the mixing of two or more substances results in new substances. Through the development of a model using an example, students are able to describe ways the geosphere, biosphere, hydrosphere, and/or atmosphere interact. They describe and graph data to provide evidence about the distribution of water on Earth. Students develop an understanding of the idea that plants get the materials they need for growth chiefly from air and water. Using models, students can describe the movement of matter among plants, animals, decomposers, and the environment and that energy in animals' food was once energy from the sun. Students are expected to develop an understanding of patterns of daily changes in length and direction of shadows, day and night, and the seasonal appearance of some stars in the night sky. The Crosscutting Concepts (CCCs) of patterns; cause and effect; scale, proportion, and quantity; energy and matter; and systems and systems models are called out as organizing concepts for these disciplinary core ideas. Students are expected to demonstrate grade-appropriate proficiency with Science and Engineering Practices (SEPs) by asking questions, developing and using models, planning and carrying out investigations, analyzing and interpreting data, designing solutions, engaging in argument from evidence, and obtaining, evaluating, and communicating information. Students will conduct inquiry-based investigations through hands-on, digital and virtual laboratory experiences. Students will be introduced to various STEM careers while in grades K-12.

The new upcoming Maryland Integrated Science Assessment (MISA) will be administered in fifth grade. Content from this course will prepare students for the assessment.

Textbook(s): *Science Dimensions*. (2017). Orlando, FL: Houghton Mifflin Harcourt.

Digital Resource: *Discovery Education Techbook*™

Science 6

Course Code: 410603

Prerequisite: Grade 5 Student

Credits: 1.0

This course is designed to actively engage students in a comprehensive science program as they enrich their understanding to make sense of the natural world through phenomenon-based instruction and the Science and Engineering Practices (SEPs) and Crosscutting Concepts (CCCs) of the Next Generation of Science Standards (NGSS). Sixth grade students will focus on Physical Science and Earth and Space Science. The Disciplinary Core Ideas (DCIs) for sixth grade includes: the structure and properties of matter, chemical reactions, types of interactions, definitions of energy, conservation of energy and energy transfer, the relationship between energy and forces, energy in chemical process and everyday life, the universe and its stars, Earth and the solar system and the history of planet Earth, Earth materials and systems, plate tectonics and large-scale system interactions, the roles of water in Earth's surface processes, weather and climate, biogeology, natural resources, natural hazards, human impact on Earth systems, and global climate change. The CCCs infused in this course will be patterns, cause and effect, scale proportion and quantity, systems and system models, structure and function, energy and matter, and stability and change. Students are expected to demonstrate proficiency in SEPs by developing and using models, analyzing and interpreting data, planning and carrying out investigations, designing solutions, asking questions, developing and using models, analyzing and interpreting data, constructing explanations and designing solutions and engaging in argument and obtaining, evaluating, and communicating information. Students will be introduced to various STEM careers while in grades K-12.

The content from this course will be assessed on the new 8th grade Maryland Integrated Science Assessment (MISA).

Textbook(s): *iScience. (2016). Columbus, OH: McGraw-Hill Education.*

Digital Resource: *Discovery Education Techbook™*

Science 6 Co-Teach

Course Code: 410673

Prerequisite: Grade 5 Student

Credits: 1.0

This course is designed for students that are in a co-taught classroom environment that will be actively engaged in a comprehensive science program as they enrich their understanding to make sense of the natural world through phenomenon-based instruction and the Science and Engineering Practices (SEPs) and Crosscutting Concepts (CCCs) of the Next Generation of Science Standards (NGSS). The co-teaching model will include various instructional strategies to meet the students' needs during science lessons. Sixth grade students will focus on Physical Science and Earth and Space Science. The Disciplinary Core Ideas (DCIs) for sixth grade includes: the structure and properties of matter, chemical reactions, types of interactions, definitions of energy, conservation of energy and energy transfer, the relationship between energy and forces, energy in chemical process and everyday life, the universe and its stars, Earth and the solar system and the history of planet Earth, Earth materials and systems, plate tectonics and large-scale system interactions, the roles of water in Earth's surface processes, weather and climate, biogeology, natural resources, natural hazards, human impact on Earth systems, and global climate change. The CCCs infused in this course will be patterns, cause and effect, scale proportion and quantity, systems and system models, structure and function, energy and matter, and stability and change. Students are expected to demonstrate proficiency in SEPs by developing and using models, analyzing and interpreting data, planning and carrying out investigations, designing solutions, asking questions, developing and using models, analyzing and interpreting data, constructing explanations and designing solutions and engaging in argument and obtaining, evaluating, and communicating information. Students will be introduced to various STEM careers while in grades K-12.

The content from this course will be assessed on the new 8th grade Maryland Integrated Science Assessment (MISA).

Science 6 Intensive

Course Code: 410683

Prerequisite: Grade 5 Student, IEP

Credits: 1.0

This course is designed for students that are identified through an IEP to be placed in an intensive classroom environment are actively engaged in a comprehensive science program as they enrich their understanding to make sense of the natural world through phenomenon-based instruction and the Science and Engineering Practices (SEPs) and Crosscutting Concepts (CCCs) of the Next Generation of Science Standards (NGSS). Students will receive appropriate instructional interventions during science lessons. Sixth grade students will focus on Physical Science and Earth and Space Science. The Disciplinary Core Ideas (DCIs) for sixth grade includes: the structure and properties of matter, chemical reactions, types of interactions, definitions of energy, conservation of energy and energy transfer, the relationship between energy and forces, energy in chemical process and everyday life, the universe and its stars, Earth and the solar system and the history of planet Earth, Earth materials and systems, plate tectonics and large-scale system interactions, the roles of water in Earth's surface processes, weather and climate, biogeology, natural resources, natural hazards, human impact on Earth systems, and global climate change. The CCCs infused in this course will be patterns, cause and effect, scale proportion and quantity, systems and system models, structure and function, energy and matter, and stability and change. Students are expected to demonstrate proficiency in SEPs by developing and using models, analyzing and interpreting data, planning and carrying out investigations, designing solutions, asking questions, developing and using models, analyzing and interpreting data, constructing explanations and designing solutions and engaging in argument and obtaining, evaluating, and communicating information. Students will be introduced to various STEM careers while in grades K-12.

The content from this course will be assessed on the new 8th grade Maryland Integrated Science Assessment (MISA).

Science 6 ESOL

Course Code: 410653

Prerequisite: Grade 5 ESOL Student

Credits: 1.0

This course is for students identified as ESOL to be actively engage in a comprehensive science program as they enrich their understanding to make sense of the natural world through phenomenon-based instruction and the Science and Engineering Practices (SEPs) and Crosscutting Concepts (CCCs) of the Next Generation of Science Standards (NGSS). ESOL instructional strategies will be implemented during science lessons. Sixth grade students will focus on Physical Science and Earth and Space Science. The Disciplinary Core Ideas (DCIs) for sixth grade includes: the structure and properties of matter, chemical reactions, types of interactions, definitions of energy, conservation of energy and energy transfer, the relationship between energy and forces, energy in chemical process and everyday life, the universe and its stars, Earth and the solar system and the history of planet Earth, Earth materials and systems, plate tectonics and large-scale system interactions, the roles of water in Earth's surface processes, weather and climate, biogeology, natural resources, natural hazards, human impact on Earth systems, and global climate change. The CCCs infused in this course will be patterns, cause and effect, scale proportion and quantity, systems and system models, structure and function, energy and matter, and stability and change. Students are expected to demonstrate proficiency in SEPs by developing and using models, analyzing and interpreting data, planning and carrying out investigations, designing solutions, asking questions, developing and using models, analyzing and interpreting data, constructing explanations and designing solutions and engaging in argument and obtaining, evaluating, and communicating information. Students will be introduced to various STEM careers while in grades K-12.

The content from this course will be assessed on the new 8th grade Maryland Integrated Science Assessment (MISA).

SOCIAL SKILLS

Personal & Social Development Kindergarten

Course Code: 98090

Prerequisites: None

This course emphasizes emotional and social competence. The teacher learns about students' sense of responsibility to themselves and others, how they feel about themselves and view themselves as learners, through the use of ongoing observations, conversations with children, and input from family members. The social competence of the student is determined through interaction with the student, observing their interactions with other adults and peers, and watching how they make decisions and solve social problems.

Textbook(s): None

Social Skills 1

Course Code: 92100

Prerequisites: None

Social skills reflect the level of student behavior that is conducive to a safe and orderly environment for all. The social skills grade will include, but is not limited to the degree by which a student is able to follow directions, show respect for others, deal with problems in a positive manner, follow classroom rules and routines, accept responsibility for his/her own actions, cooperate with adults/peers.

Textbook(s): None

Social Skills 2

Course Code: 92200

Prerequisites: None

Social skills reflect the level of student behavior that is conducive to a safe and orderly environment for all. The social skills grade will include, but is not limited to the degree by which a student is able to follow directions, show respect for others, deal with problems in a positive manner, follow classroom rules and routines, accept responsibility for his/her own actions, cooperate with adults/peers.

Textbook(s): None

Social Skills 3

Course Code: 92300

Prerequisites: None

Social skills reflect the level of student behavior that is conducive to a safe and orderly environment for all. The social skills grade will include, but is not limited to the degree by which a student is able to follow directions, show respect for others, deal with problems in a positive manner, follow classroom rules and routines, accept responsibility for his/her own actions, cooperate with adults/peers.

Textbook(s): None

Social Skills 4

Course Code: 92400

Prerequisites: None

Social skills reflect the level of student behavior that is conducive to a safe and orderly environment for all. The social skills grade will include, but is not limited to the degree by which a student is able to follow directions, show respect for others, deal with problems in a positive manner, follow classroom rules and routines, accept responsibility for his/her own actions, cooperate with adults/peers.

Textbook(s): None

Social Skills 5

Course Code: 92500

Prerequisites: None

Social skills reflect the level of student behavior that is conducive to a safe and orderly environment for all. The social skills grade will include, but is not limited to the degree by which a student is able to follow directions, show respect for others, deal with problems in a positive manner, follow classroom rules and routines, accept responsibility for his/her own actions, cooperate with adults/peers.

Textbook(s): None

SOCIAL STUDIES

Social Studies Kindergarten

Course Code: 98020

Prerequisites: None

Students begin to learn the basic concepts of Social Studies. Using their observations in school and in their community, students describe how people of different cultural backgrounds interact cooperatively, meet human needs and contribute to the community. Students begin to use geographic tools to locate places in their community. They learn about geographic characteristics used to describe places and how these characteristics influence how people live and work. Students describe how economic choices, tools, and products affect people's daily lives, work, and leisure activities. Students also examine events, photographs, objects, and written text to describe differences between the past and present and how individuals and societies change over time.

Textbook(s): My World Social Studies We Are Here, ISBN 9780328703371

Social Studies 1

Course Code: 20100

Prerequisites: None

Students continue to learn Social Studies around the big ideas. Students learn about America and expand their understanding of the purpose and function of government, including people who contributed to the political system, symbols related to the United States of America, and the importance of national holidays. Using their observations in school and in their community, students describe how people of different cultural backgrounds interact cooperatively, meet human needs and contribute to the community. Students begin to use geographic tools to locate places in their community. They learn about geographic characteristics used to describe places and how these characteristics influence how people live and work. Students describe how economic choices, tools, and products affect people's daily lives, work, and leisure activities. Students also examine events, photographs, objects, and written text to describe differences between the past and present and how individuals and societies change over time.

Textbook(s): My World Social Studies Making Our Way, ISBN 9780328639168

Social Studies 2

Course Code: 20200

Prerequisites: None

Students continue to learn Social Studies around the big ideas or cultural universals. Students continue to learn about government and how it maintains order and protects citizens. Through these understandings, students expand their knowledge of democratic skills and how people participate and contribute to the political system. Students also explore their own family's history and stories about distinctive individuals, achievements, tradition, and customs. Students also learn modes and limitations of communication and transportation. They study why transportation is necessary and how it affects the lives of consumers and their communities. Students expand their understanding of economic concepts by identifying producers, consumers, buyers, and sellers in their own communities. Students examine personal and community events, artifacts, photographs, and written text to describe differences between the past and present and how individuals and societies change over time.

Textbook(s): My World Social Studies We Do Our Part, ISBN 9780328639274

Social Studies 3

Course Code: 20300

Prerequisites: None

Students continue to focus on elements of culture both here and around the world. Students continue to learn about government and democratic principles such as individual rights and responsibilities, patriotism, common good, justice and equality. Through these understandings, students expand their knowledge of how government works and how citizens participate in a democracy. Students also learn about the benefits of living in a diverse community and the commonalities and differences of communities and cultures around the world using non-fiction text and classroom discussions. Students continue to develop geographic awareness and identify, locate, and compare places around the world using geographic characteristics. Students expand their understanding of economic concepts by learning about the production and consumption of goods and services. They also learn about how some services are provided by the government and are paid for by the people through taxes. Students examine primary and secondary sources to learn about how people lived in the past.

Textbook(s): My World Social Studies We Are Connected, ISBN 9780328639397

Social Studies 4

Course Code: 20400

Prerequisites: None

Students focus on the geography and people of Maryland past to present. Students learn about the political foundations of Maryland and research the contributions made by Marylanders. They explore the cultural characteristics and traditions of the various groups of people who inhabited the state. Students use geographic tools to locate, describe, and compare the natural/physical features of Maryland and study how transportation and communication networks contributed to its development. Students also learn cultural and physical geography by using geographic tools to locate and construct meaning about places, identify the movement of people and ideas, and explain how people modify and adapt their environment. They examine regional economic specialization and the impact on people's lives. Students also analyze the chronology and significance of key events throughout Maryland's history and their effect on diversity and tolerance today.

Textbook(s): My World Social Studies Maryland, ISBN 9780328639229

Social Studies 5

Course Code: 20500

Prerequisites: None

Students learn United States history from the early colonial period to 1790. Students examine the early development of democratic institutions and ideas, including the people and events that led to the independence of the original thirteen colonies and the formation of a national government under the United States Constitution. They learn about political, economic, and social consequences of migration among the colonies, Europe, and Africa. Students use geographic tools to locate regions and geographic characteristics to investigate how people lived and worked in colonial America. They examine interdependence, trade, and economic growth in the colonies and how changes in technology affected production and consumption. Students use historical investigations to analyze the chronology and significance of historical events leading to early settlements and the growth and development of colonial America.

World Cultures and Geography Part 1: Western Hemisphere

Course Code: 208603

Prerequisites: Grade 6 student

Sixth grade social studies is the first of a two year World Cultures and Geography program of study. This course will explore the Western Hemisphere that includes the history, geography, and culture of the United States, Canada, Latin America, Mexico and Central America, The Caribbean, and South America. Reading, writing, literature, and critical thinking skills are integral parts of the course. This middle school social studies course emphasizes development of knowledge and skills that will prepare students for success at the high school level.

Textbook(s): World Cultures & Geography: Western Hemisphere, ISBN 9781285933252

World Cultures and Geography Part 1: Western Hemisphere Co-Teach

Course Code: 208673

Prerequisites: Grade 6 student

Sixth grade social studies is the first of a two year World Cultures and Geography program of study. This course will explore the Western Hemisphere that includes the history, geography, culture of the United States, Canada, Latin America, Mexico and Central America, The Caribbean, and South America. Reading, writing, literature, and critical thinking skills are integral parts of the course. This middle school social studies course emphasizes development of knowledge and skills that will prepare students for success at the high school level. This course is designed to facilitate learning outcomes appropriate to the instructional needs of the student. Students access the general education curriculum through modifications and accommodations as appropriate.

Textbook(s): World Cultures & Geography: Western Hemisphere, ISBN 9781285933252

World Cultures and Geography Part 1: Western Hemisphere Intensive

Course Code: 208683

Prerequisites: Grade 6 student

Sixth grade social studies is the first of a two year World Cultures and Geography program of study. This course will explore the Western Hemisphere that includes the history, geography, and culture of the United States, Canada, Latin America, Mexico and Central America, The Caribbean, and South America. Reading, writing, literature, and critical thinking skills are integral parts of the course. This middle school social studies course emphasizes development of knowledge and skills that will prepare students for success at the high school level. This course is designed to facilitate learning outcomes appropriate to the instructional needs of the student, as identified on the Individualized Education Plan. Students access the general education curriculum through modifications and accommodations to meet IEP requirements. Course content is delivered in a small instructional group as designated by the student's Individualized Education Plan.

Textbook(s): World Cultures & Geography: Western Hemisphere, ISBN 9781285933252

World Cultures and Geography Part 1: Western Hemisphere Honors

Course Code: 208893

Prerequisites: Grade 6 student; "B" in Social Studies and English

Sixth grade social studies is the first of a two year World Cultures and Geography program of study. This course will explore the Western Hemisphere that includes the history, geography, and culture of the United States, Canada, Latin America, Mexico and Central America, The Caribbean, and South America. Reading, writing, literature, and critical thinking skills are integral parts of the course. This middle school social studies course emphasizes development of knowledge and skills that will prepare students for success at the high school level. This course is designed for identified highly able students who have met the prerequisites. The course will further develop content knowledge by enhancing the depth and complexity of the core curriculum. Students will use critical

thinking skills in analyzing advanced above-grade level texts as well as complete rigorous, in-depth writing assignments. The Honors curriculum can not be delivered to students in a pull-out format if students are to received the weighted credit.

SPECIAL EDUCATION

SPECIAL EDUCATION - FINE ARTS

Art Alt

Course Code: 602130

Prerequisites: IEP and Participation in Alternate Academic Outcomes

The curriculum provides various art experiences that allow students to identify, describe and interpret observed forms. Students have opportunities to create images and forms from observation, memory, imagination and feelings. Students also observe and describe artworks using art vocabulary to express personal responses. Group activities are a part of this course. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBA

Music Alt

Course Code: 623030

Prerequisites: IEP and Participation on Alternate Academic Outcomes

The Vocal and General Music Program of Instruction provides all students with appropriate resources and experiences to develop positive attitudes and sensitivities toward music. Through the implementation of sequential musical skills and concepts students develop an understanding of the intrinsic value of music and its relationship to diverse cultures, traditions, values and beliefs. The Program is also designed to foster enjoyment and appreciation of music beyond the limits of classroom instruction. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBA

SPECIAL EDUCATION - HEALTH

Health Education Kindergarten Alt

Course Code: 74700

Prerequisites: IEP

Health education for young students focuses on what they can do to promote good health and well-being, making clear connections to their immediate environment and health information, concepts, skills, and behaviors. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Health Education 1 Alt

Course Code: 74710

Prerequisites: IEP

Health education for young students focuses on what they can do to promote good health and well-being, making clear connections to their immediate environment and health information, concepts, skills, and behaviors. Central themes in first grade Health Education are the acceptance of personal responsibility for lifelong health, respect for and promotion of the health of others, an understanding of the process of growth and development, and informed use of health-related information, products, and services. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbooks(s): TBD

Health Education 2 Alt

Course Code: 74720

Prerequisites: IEP

Health education for young students focuses on what they can do to promote good health and well-being, making clear connections to their immediate environment and health information, concepts, skills, and behaviors. In second grade Health Education, students learn how to care for their bodies, communicate effectively, and positively contribute as members of their classroom and families, practice safe behaviors, prevent common accidents, respond to emergencies; distinguish between helpful and harmful substances; know how to make healthy food choices, participate in active play, and get sufficient sleep; understand the stages of the life cycle; recognize symptoms of common illnesses; and practice good personal hygiene to prevent the spread of disease. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Health Education 3 Alt

Course Code: 74730

Prerequisites: IEP and Participation in an Alternate Assessment

Health Education for intermediate students focuses on how they can assume more responsibility for their health, develop positive health behaviors, and prevent negative, unhealthy behaviors. In grade three Health Education, building upon earlier learning, students learn how to identify health resources in the community; practice safe behaviors, identify hazards and actions to remove those hazards from their surroundings; respond to emergencies and develop conflict resolution skills; learn to make healthy food choices, set personal fitness goals, and meet the sleep needs of a growing body. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Health Education 4 Alt

Course Code: 74740

Prerequisites: IEP and Participation in an Alternate Assessment

Health Education for intermediate students focuses on how they can assume more responsibility for their health, develop positive health behaviors, and prevent negative, unhealthy behaviors. In grade four students learn to practice safe behaviors, identify hazards and actions to remove those hazards from their surroundings, respond to emergencies and develop conflict resolution skills; identify effects of drugs on the body, understand influences that promote drug use, and develop the skills needed to resist those influences. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Health Education 5 Alt

Course Code: 74750

Prerequisites: IEP and Participation in an Alternate Assessment

Health Education, acceptance of differences in individual growth and development as well as strategies to prevent the use of alcohol, tobacco, and other drugs is woven throughout the curriculum. Students recognize treatments of major communicable and non-communicable diseases and practice good personal hygiene to prevent the spread of disease. The anatomy and physiology of the reproductive system are introduced. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Health Education 6 Alt

Course Code: 74760

Prerequisites: IEP and Participation in an Alternate Assessment

This course focuses on instruction of the Maryland State Curriculum for Comprehensive Health Education. Students acquire knowledge about nutrition and fitness, healthy decision-making, communication, stress management, and safety and injury prevention. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

SPECIAL EDUCATION - MATHEMATICS

Mathematics Thinking-Kindergarten Alt

Course Code: 30700

Prerequisites: IEP

Students are provided access to instruction that promotes mathematical processes/thinking, as detailed in the Common Core Standards for Mathematical Practice as well as content standards

for numeration, algebra, geometry, measurement, and data are taught. Skills and concepts will include but are not limited to representing, comparing, and ordering whole numbers and joining and separating sets; describing shapes and space; and ordering objects by measurable attributes. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Mathematics 1 Alt

Course Code: 30710

Prerequisites: IEP

Students are provided access to instruction that promotes mathematical processes/thinking, as detailed in the Common Core Standards for Mathematical Practice as well as content standards for numeration, algebra, geometry, measurement, and data are taught. Skills and concepts will include but are not limited to developing understandings of addition and subtraction and strategies for basic addition facts and related subtraction facts, developing an understanding of whole number relationships and place value, including grouping in tens and ones, developing and understanding linear measurement, and reasoning about attributes of, and composing and decomposing geometric shapes. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Mathematics 2 Alt

Course Code: 30720

Prerequisites: IEP

Students are provided access to instruction that promotes mathematical processes/thinking, as detailed in the Common Core Standards for Mathematical Practice as well as content standards for numeration, algebra, geometry, measurement, and data are taught. Skills and concepts will include but are not limited to understanding the base-ten numeration system, building fluency with addition and subtraction, using standard units of measure, and describing and analyzing shapes. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Mathematics 3 Alt

Course Code: 30730

Prerequisites: IEP and Participation in an Alternate Assessment

Students are provided access to instruction that promotes mathematical processes/thinking, as detailed in the Common Core Standards for Mathematical Practice as well as content standards for numeration, algebra, geometry, measurement, and data are taught as appropriate for the grade level. Skills and concepts will include but are not limited to developing an understanding of basic

multiplication and division, fractions and unit fractions and related division facts, understanding the structure of rectangular arrays and describing properties of two-dimensional shapes. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Mathematics 4 Alt

Course Code: 30740

Prerequisites: IEP and Participation in an Alternate Assessment

Students are provided access to instruction that promote mathematical processes/thinking, as detailed in the Common Core Standards for Mathematical Practice as well as content standards for numeration, algebra, geometry, measurement, and data are taught as appropriate for the grade level. Skills and concepts will include but are not limited to developing understanding and fluency for multi-digit multiplication and division, developing an understanding of fraction equivalence, computing with fractions and analyzing geometric properties. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Mathematics 5 Alt

Course Code: 30750

Prerequisites: IEP and Participation in Alternate Assessments

Students are provided access to instruction will promote mathematical processes/thinking, as detailed in the Common Core Standards for Mathematical Practice as well as content standards for numeration, algebra, geometry, measurement, and data are taught as appropriate for the grade level. Skills and concepts will include but are not limited to developing fluency with adding and subtracting fractions, developing an understanding of multiplication and division of fractions, extending computation to include decimal numbers, and developing an understanding of volume. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Mathematics 6 Alt

Course Code:

Prerequisites: IEP and Participation in Alternate Assessments

This course is designed to provide students access to the mathematics standards to include multiplication, division, algebraic thinking and application of geometry in real-world mathematics situations. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a

different scope and sequence, adapted and modified materials.

Textbook(s): TBD

SPECIAL EDUCATION - READING/LANGUAGE ARTS

Literacy Kindergarten Alt

Course Code:

Prerequisites: IEP

Students are provided access to strategies for comprehension of literature and information texts. Letters are identified along with the sounds they make. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Reading 1 Alt

Course Code: 13910

Prerequisites: IEP

Students are provided access to a variety of leveled texts across genres and text types. Letters are identified along with the sounds they make. Students are also provided access to the Maryland College and Career-Ready Standards in the area of Foundational Skills to include phonemic awareness and phonics. Reading strategies are reinforced to aid in comprehension. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Reading Alt 2

Course Code: 13920

Prerequisites: IEP

Students are provided access to a variety of leveled texts across genres and text types. Students are also provided access to the Maryland College and Career-Ready Standards in the area of Foundational Skills to include phonemic awareness and phonics. Reading strategies are reinforced to aid in comprehension. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Reading 3 Alt

Course Code: 13930

Prerequisites: IEP and Participation in an Alternate Assessment

Students are provided access to a variety of leveled texts across genres and text types. Students are also provided access to the Maryland College and Career-Ready Standards in the area of Foundational Skills to include phonemic awareness and phonics. Reading strategies are reinforced to aid in comprehension. Students analyze the key ideas and details, and integration of knowledge and ideas in a wide range of literature and informational texts. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Reading 4 Alt

Course Code: 13940

Prerequisites: IEP and Participation in an Alternate Assessment

Students are provided access to a variety of leveled texts across genres and text types. Reading/English Language Arts 6 Alt

Course Code: 139043

Prerequisites: IEP and Participation in an Alternate Assessment

This course provides student access to the Maryland College and Career-Ready Standards in the areas of for reading, writing, listening, and speaking. Reading and writing instruction focuses on literary and informational text as well as generalizing skills in real world applications. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

SPECIAL EDUCATION - SCIENCE

Science K Alt

Course Code: 41800

Prerequisites: IEP

Students are provided access to actively engage in learning to view the world scientifically. Teachers will ask questions about nature and students will collect things, count and measure things, observe, and classify using pictures, oral or written language. Students have multiple experiences applying and practicing science skills and processes in life, earth, and physical sciences aligned to the Next Generation Science Standards (NGSS). This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Science 1 Alt

Course Code: 41810

Prerequisites: IEP

Students are provided access to understand the view of the world scientifically. Teachers will ask questions about nature and students will collect things, count and measure things, observe, classify, organize collections, and discuss findings using simple diagrams, pictures, oral or written language. Students have multiple experiences applying and practicing science skills and processes in life, earth, and physical sciences aligned to the Next Generation Science Standards (NGSS). This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Science 2 Alt

Course Code: 41820

Prerequisites: IEP

Students will ask questions about nature and students will collect things, count and measure things, observe, classify, organize collections, and discuss findings using simple diagrams, pictures, oral

or written language. Students have multiple experiences applying and practicing science skills and processes in life, earth, and physical sciences aligned to the Next Generation Science Standards (NGSS). This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s):TBD

Science 3 Alt

Course Code: 41830

Perquisites: IEP and Participation in Alternate Assessments

Students are provided access to discover more about their surroundings while conducting simple investigations with the teacher. With assistance, students observe carefully, measure things with increasing accuracy, record data in science notebooks and communicate their results in charts and simple graphs. Students have multiple experiences applying and practicing science skills and processes in life, earth, and physical sciences aligned to the Next Generation Science Standards (NGSS). This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Science 6 Alt

Course Code:

Prerequisites: IEP and Participation in Alternate Assessments

This course focuses on science investigations. Students learn from hands-on activities, teacher demonstrations, cooperative learning, small group, and whole group experiences aligned to the Next Generation of Science Standards (NGSS). Students have multiple experiences applying and practicing science skills and processes in life, earth, and physical sciences. Instruction will be delivered in small instructional groupings for special needs intensive students. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

SPECIAL EDUCATION - SOCIAL STUDIES

Social Studies K Alt

Course Code: 20700

Prerequisites: IEP

Students begin to learn the basic concepts of Social Studies. Using their observations in school and in their community, students describe how people of different cultural backgrounds interact cooperatively, meet human needs and contribute to the community. Students begin to use geographic tools to locate places in their community. They learn about geographic characteristics used to describe places and how these characteristics influence how people live and work. Students describe how economic choices, tools, and products affect people's daily lives, work, and leisure activities. Students also examine events, photographs, objects, and written text to describe differences between the past and present and how individuals and societies change over time. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Social Studies 1 Alt

Course Code: 20710

Prerequisites: IEP

Students continue to learn Social Studies around the big ideas or cultural universals. Students learn about America and expand their understanding of the purpose and function of government, including people who contributed to the political system, symbols related to the United States of America, and the importance of national holidays. Using their observations in school and in their community, students describe how people of different cultural backgrounds interact cooperatively, meet human needs and contribute to the community. Students begin to use geographic tools to

locate places in their community. They learn about geographic characteristics used to describe places and how these characteristics influence how people live and work. Students describe how economic choices, tools, and products affect people's daily lives, work, and leisure activities. Students also examine events, photographs, objects, and written text to describe differences between the past and present and how individuals and societies change over time. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Social Studies 2 Alt

Course Code: 20720

Prerequisites: IEP

Students continue to learn Social Studies around the big ideas or cultural universals. Students continue to learn about government and how it maintains order and protects citizens. Through these understandings, students expand their knowledge of democratic skills and how people participate and contribute to the political system. Students also explore their own family's history and stories about distinctive individuals, achievements, tradition, and customs. Students also learn modes and limitations of communication and transportation. They study why transportation is necessary and how it affects the lives of consumers and their communities. Students expand their understanding of economic concepts by identifying producers, consumers, buyers, and sellers in their own communities. Students examine personal and community events, artifacts, photographs, and written text to describe differences between the past and present and how individuals and societies change over time. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Social Studies 3 Alt

Course Code: 20730

Prerequisites: IEP

Students continue to focus on elements of culture both here and around the world. Students continue to learn about government and democratic principles such as individual rights and responsibilities, patriotism, common good, justice and equality. Through these understandings, students expand their knowledge of how government works and how citizens participate in a democracy. Students also learn about the benefits of living in a diverse community and the commonalities and differences of communities and cultures around the world using non-fiction text and classroom discussions. Students continue to develop geographic awareness and identify, locate, and compare places around the world using geographic characteristics. Students expand their understanding of economic concepts by learning about the production and consumption of goods and services. They also learn about how some services are provided by the government and are paid for by the people through taxes. Students examine primary and secondary sources to learn about how people lived in the past. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Social Studies 4 Alt

Course Code: 20740

Prerequisites: IEP and Participation in Alternate Assessments

Students focus on the geography and people of Maryland past to present. Students learn about the political foundations of Maryland and research the contributions made by Marylanders. They explore the cultural characteristics and traditions of the various groups of people who inhabited the state. Students use geographic tools to locate, describe, and compare the natural/physical features of Maryland and study how transportation and communication networks contributed to its development. Students also learn cultural and physical geography by using geographic tools to locate and construct meaning about places, identify the movement of people and ideas, and explain how people modify and adapt their environment. They examine regional economic specialization and the impact on people's lives. Students also analyze the chronology and significance of key events throughout Maryland's history and their effect on diversity and tolerance today. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials.

Textbook(s): TBD

Social Studies 5 Alt

Course Code: 20750

Prerequisites: I IEP and Participation in Alternate Assessments

Students focus on the geography and people of Maryland past to present. Students learn about the political foundations of Maryland and research the contributions made by Marylanders. They explore the cultural characteristics and traditions of the various groups of people who inhabited the state. Students use geographic tools to locate, describe, and compare the natural/physical features of Maryland and study how transportation and communication networks contributed to its development. SPECIAL EDUCATION - TECHNOLOGY

Technology K Alt

Course Code: 80100

Prerequisites: IEP; Participation in Instruction Based on Alternate Academic Achievement Standards

Students in the course will become familiar with the parts of the computer or other technology devices and how each part works. The students will be introduced to computer terms and basic navigation skills such as how to use a mouse and finding letters on the keyboard. Students will be introduced to menu bars, icons and how to respond and access educational websites. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials

Textbook(s): TBD

Technology 1 Alt

Course Code: 80110

Prerequisites: IEP; Participation in Instruction Based on Alternate Academic Achievement Standards

Students in the course will become familiar with the parts of the computer or other technology devices and how each part works. The students will be introduced to computer terms and basic navigation skills such as how to use a mouse and finding letters on the keyboard. Students will be introduced to menu bars, icons and how to respond and access educational websites. This course is designed to facilitate alternate academic learning outcomes appropriate to the instructional needs of the student, as documented in the Individualized Education Plan (IEP). This course is linked to the general education curriculum; however, the student will require a different scope and sequence, adapted and modified materials
